THIRD SERIES, VOLUME 95, NUMBER 5
PARTS A AND B

CONTENTS

MAY 2017

The Table of Contents is a total listing of Parts A and B.
Part A consists of pages 050101(R)–052320, and Part B pages 052401–053309.

PART A

RAPID COMMUNICATIONS

Statistical Physics

- Energy-dissipation anomaly in systems of localized waves (*5 pages*) 050101(R)
Basile Gallet
- Quantum-to-classical transition in the work distribution for chaotic systems (*4 pages*) 050102(R)
Ignacio García-Mata, Augusto J. Roncaglia, and Diego A. Wisniacki
- Driven Brownian particle as a paradigm for a nonequilibrium heat bath: Effective temperature and cyclic work extraction (*6 pages*) 050103(R)
R. Wulfert, M. Oechsle, T. Speck, and U. Seifert

Nonlinear Dynamics and Chaos

- Coherent oscillations of driven rf SQUID metamaterials (*5 pages*) 050201(R)
Melissa Trepanier, Daimeng Zhang, Oleg Mukhanov, V. P. Koshelets, Philipp Jung, Susanne Butz, Edward Ott, Thomas M. Antonsen, Alexey V. Ustinov, and Steven M. Anlage

Polymers

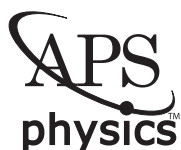

- Solvent-dependent critical properties of polymer adsorption (*5 pages*) 050501(R)
João A. Plascak, Paulo H. L. Martins, and Michael Bachmann

Colloids, Complex Fluids, and Active Matter

- Nonmonotonic dynamic correlations in quasi-two-dimensional confined glass-forming liquids (*5 pages*) 050601(R)
Baicheng Mei, Yuyuan Lu, Lijia An, Hongfei Li, and Liang Wang

Granular Materials

- Collisional dissipation rate in shearing flows of granular liquid crystals (*5 pages*) 050901(R)
Diego Berzi, Nha Thai-Quang, Yu Guo, and Jennifer Curtis

Copyright 2017 by American Physical Society

2470-0045(201705)95:5:A;1-3

(Continued)

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

CONTENTS - *Continued*

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 95, NUMBER 5

MAY 2017

Fluid Dynamics

- Mechanism of unconfined dust explosions: Turbulent clustering and radiation-induced ignition (*5 pages*) 051101(R)
Michael Liberman, Nathan Kleeorin, Igor Rogachevskii, and Nils Erland L. Haugen

Plasma Physics

- Plasma high-order-harmonic generation from ultraintense laser pulses (*5 pages*) 051201(R)
Suo Tang, Naveen Kumar, and Christoph H. Keitel
- Measurement of the shell decompression in direct-drive inertial-confinement-fusion implosions (*5 pages*) 051202(R)
D. T. Michel, S. X. Hu, A. K. Davis, V. Yu. Glebov, V. N. Goncharov, I. V. Igumenshchev,
P. B. Radha, C. Stoeckl, and D. H. Froula

Computational Physics

- Nearly maximally predictive features and their dimensions (*6 pages*) 051301(R)
Sarah E. Marzen and James P. Crutchfield

ARTICLES

Statistical Physics

- Critical behavior of the two-dimensional Ising model with a slit (*6 pages*) 052101
Xintian Wu
- Lévy flights versus Lévy walks in bounded domains (*13 pages*) 052102
Bartłomiej Dybiec, Ewa Gudowska-Nowak, Eli Barkai, and Alexander A. Dubkov
- Multiple random walks on complex networks: A harmonic law predicts search time (*9 pages*) 052103
Tongfeng Weng, Jie Zhang, Michael Small, and Pan Hui
- Temperature distribution and heat radiation of patterned surfaces at short wavelengths (*7 pages*) 052104
Thorsten Emig
- One-dimensional irreversible aggregation with dynamics of a totally asymmetric simple exclusion process (*10 pages*) 052105
N. Zh. Bunzarova and N. C. Pesheva
- Dynamics of a mechanical system with multiple degrees of freedom out of thermal equilibrium (*8 pages*) 052106
A. Feigel
- Anomalous diffusion on a fractal mesh (*10 pages*) 052107
Trifce Sandev, Alexander Iomin, and Holger Kantz
- Asymptotic prime partitions of integers (*9 pages*) 052108
Johann Bartel, R. K. Bhaduri, Matthias Brack, and M. V. N. Murthy
- Kinetic percolation (*6 pages*) 052109
W. R. Heinson, A. Chakrabarti, and C. M. Sorensen
- Memory-induced diffusive-superdiffusive transition: Ensemble and time-averaged observables (*11 pages*) 052110
Adrián A. Budini

(Continued)

Experimental investigations and phase-field simulations of triple-phase-separation kinetics within liquid ternary Co-Cu-Pb immiscible alloys (<i>15 pages</i>)	052111
Y. H. Wu, W. L. Wang, N. Yan, and B. Wei	
Composition law of κ -entropy for statistically independent systems (<i>5 pages</i>)	052112
G. Kaniadakis, A. M. Scarfone, A. Sparavigna, and T. Wada	
Viscosity of a classical gas: The rare-collision versus the frequent-collision regime (<i>7 pages</i>)	052113
A. G. Magner, M. I. Gorenstein, and U. V. Grygoriev	
Estimating higher-order structure functions from geophysical turbulence time series: Confronting the curse of the limited sample size (<i>11 pages</i>)	052114
Adam W. DeMarco and Sukanta Basu	
Universal spatiotemporal scaling of distortions in a drifting lattice (<i>8 pages</i>)	052115
Pritha Dolai, Abhik Basu, and Aditi Simha	
Measuring effective temperatures in a generalized Gibbs ensemble (<i>8 pages</i>)	052116
Laura Foini, Andrea Gambassi, Robert Konik, and Leticia F. Cugliandolo	
Numerical study of the F model with domain-wall boundaries (<i>14 pages</i>)	052117
Rick Keesman and Jules Lamers	
Capturing Brownian dynamics with an on-lattice model of hard-sphere diffusion (<i>9 pages</i>)	052118
Claudia Cianci, Stephen Smith, and Ramon Grima	
Cavity master equation for the continuous time dynamics of discrete-spin models (<i>14 pages</i>)	052119
E. Aurell, G. Del Ferraro, E. Domínguez, and R. Mulet	
Similarity law for Widom lines and coexistence lines (<i>5 pages</i>)	052120
D. T. Banuti, M. Raju, and M. Ihme	
Global stability and H theorem in lattice models with nonconservative interactions (<i>12 pages</i>)	052121
C. A. Plata and A. Prados	
Breakdown of the Stokes-Einstein relation in pure Lennard-Jones fluids: From gas to liquid via supercritical states (<i>6 pages</i>)	052122
Norikazu Ohtori, Shohei Miyamoto, and Yoshiki Ishii	
Two coupled, driven Ising spin systems working as an engine (<i>6 pages</i>)	052123
Debarshi Basu, Joydip Nandi, A. M. Jayannavar, and Rahul Marathe	
Colored percolation (<i>9 pages</i>)	052124
Sumanta Kundu and S. S. Manna	
Large-scale structure of randomly jammed spheres (<i>10 pages</i>)	052125
Atsushi Ikeda, Ludovic Berthier, and Giorgio Parisi	
Variance of permutation entropy and the influence of ordinal pattern selection (<i>9 pages</i>)	052126
Douglas J. Little and Deb M. Kane	
Evolution of moments and correlations in nonrenewal escape-time processes (<i>13 pages</i>)	052127
Wilhelm Braun, Rüdiger Thul, and André Longtin	

(Continued)

Stationary engines in and beyond the linear response regime at the Carnot efficiency (<i>10 pages</i>)	052128
Naoto Shiraishi	
Finite-size corrections in the random assignment problem (<i>15 pages</i>)	052129
Sergio Caracciolo, Matteo P. D'Achille, Enrico M. Malatesta, and Gabriele Sicuro	
Diffusion-driven self-assembly of rodlike particles: Monte Carlo simulation on a square lattice (<i>11 pages</i>)	052130
Nikolai I. Lebovka, Yuri Yu. Tarasevich, Volodymyr A. Gigiberiya, and Nikolai V. Vygornitskii	
Approximate probabilistic cellular automata for the dynamics of single-species populations under discrete logisticlike growth with and without weak Allee effects (<i>9 pages</i>)	052131
J. Ricardo G. Mendonça and Yeva Gevorgyan	
Entropy of diluted antiferromagnetic Ising models on frustrated lattices using the Wang-Landau method (<i>8 pages</i>)	052132
Yuriy Shevchenko, Konstantin Nefedev, and Yutaka Okabe	
Dual time scales in simulated annealing of a two-dimensional Ising spin glass (<i>12 pages</i>)	052133
Shanon J. Rubin, Na Xu, and Anders W. Sandvik	
Double diffusivity model under stochastic forcing (<i>10 pages</i>)	052134
Amit K. Chattopadhyay and Elias C. Aifantis	
Phase transitions at high energy vindicate negative microcanonical temperature (<i>12 pages</i>)	052135
P. Buonsante, R. Franzosi, and A. Smerzi	
Local time of Lévy random walks: A path integral approach (<i>9 pages</i>)	052136
Václav Zatloukal	
Work distributions for random sudden quantum quenches (<i>8 pages</i>)	052137
Marcin Łobejko, Jerzy Łuczka, and Peter Talkner	
Heat fluctuations of Brownian oscillators in nonstationary processes: Fluctuation theorem and condensation transition (<i>14 pages</i>)	052138
A. Crisanti, A. Sarracino, and M. Zannetti	
Nonscaling displacement distributions as may be seen in fluorescence correlation spectroscopy (<i>8 pages</i>)	052139
S. M. J. Khadem and I. M. Sokolov	
Effect of antifreeze protein on heterogeneous ice nucleation based on a two-dimensional random-field Ising model (<i>6 pages</i>)	052140
Zhen Dong, Jianjun Wang, and Xin Zhou	
Charge and spin current statistics of the open Hubbard model with weak coupling to the environment (<i>9 pages</i>)	052141
Berislav Buča and Tomaž Prosen	
Microscopic derivation of the hydrodynamics of active-Brownian-particle suspensions (<i>10 pages</i>)	052142
Stefano Steffenoni, Gianmaria Falasco, and Klaus Kroy	
Limiting the stroke of a Schmitt trigger with multiplicative noise (<i>7 pages</i>)	052143
Gabriel A. Zarza, Sergio E. Mangioni, Javier Fernandez Acevedo, and Roberto R. Deza	
Origin of the inverse energy cascade in two-dimensional quantum turbulence (<i>8 pages</i>)	052144
Audun Skaugen and Luiza Angheluta

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 95, NUMBER 5

MAY 2017

Condensation of Lee-Yang zeros in scalar field theory (6 pages)	052145
N. G. Antoniou, F. K. Diakonos, X. N. Maintas, and C. E. Tsagkarakis	
Six-vertex model and Schramm-Loewner evolution (5 pages)	052146
Richard Kenyon, Jason Miller, Scott Sheffield, and David B. Wilson	
Quantum Monte Carlo study of the spin-1/2 honeycomb Heisenberg model with mixed antiferromagnetic and ferromagnetic interactions in external magnetic fields (11 pages)	052147
Yi-Zhen Huang and Gang Su	
Nondivergent and negative susceptibilities around critical points of a long-range Hamiltonian system with two order parameters (14 pages)	052148
Yoshiyuki Y. Yamaguchi and Daiki Sawai	
Localization in random bipartite graphs: Numerical and empirical study (14 pages)	052149
František Šlanina	
Zero-temperature coarsening in the Ising model with asymmetric second-neighbor interactions in two dimensions (8 pages)	052150
Pratik Mullick and Parongama Sen	
Nonlinear Dynamics and Chaos	
Reducing microwave absorption with fast frequency modulation (5 pages)	052201
Juehang Qin and A. Hubler	
Nonuniversality in the spectral properties of time-reversal-invariant microwave networks and quantum graphs (8 pages)	052202
Barbara Dietz, Vitalii Yunko, Małgorzata Białous, Szymon Bauch, Michał Ławniczak, and Leszek Sirko	
Qualitative changes in phase-response curve and synchronization at the saddle-node-loop bifurcation (12 pages)	052203
Janina Hesse, Jan-Hendrik Schleimer, and Susanne Schreiber	
Splitting in the pinning-depinning transition of fronts in long-delayed bistable systems (7 pages)	052204
Francesco Marino, Giovanni Giacomelli, and Stephane Barland	
Noise-induced transitions in a double-well excitable oscillator (7 pages)	052205
Vladimir V. Semenov	
Recurrence measure of conditional dependence and applications (8 pages)	052206
Antônio M. T. Ramos, Alejandro Builes-Jaramillo, Germán Poveda, Bedartha Goswami, Elbert E. N. Macau, Jürgen Kurths, and Norbert Marwan	
Hierarchical structure in sharply divided phase space for the piecewise linear map (8 pages)	052207
Akira Akaishi, Kazuki Aoki, and Akira Shudo	
Pattern formation in a reaction-diffusion system of Fitzhugh-Nagumo type before the onset of subcritical Turing bifurcation (7 pages)	052208
Maxim Kuznetsov, Andrey Kolobov, and Andrey Polezhaev	
Probability of noise- and rate-induced tipping (13 pages)	052209
Paul Ritchie and Jan Sieber	

(Continued)

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 95, NUMBER 5

MAY 2017

Synchronization of fluctuating delay-coupled chaotic networks (<i>11 pages</i>)	052210
Manuel Jiménez-Martín, Javier Rodríguez-Laguna, Otti D’Huys, Javier de la Rubia, and Elka Korutcheva	
Dynamics of a bistable Miura-origami structure (<i>11 pages</i>)	052211
Hongbin Fang, Suyi Li, Huimin Ji, and K. W. Wang	
Spontaneous exchange of leader-laggard relationship in mutually coupled synchronized semiconductor lasers (<i>12 pages</i>)	052212
Kazutaka Kanno, Takuya Hida, Atsushi Uchida, and Masatoshi Bunsen	
Chaos in the band structure of a soft Sinai lattice (<i>11 pages</i>)	052213
Max D. Porter, Aaron Barr, Ariel Barr, and L. E. Reichl	
Localized dark solitons and vortices in defocusing media with spatially inhomogeneous nonlinearity (<i>8 pages</i>)	052214
Jianhua Zeng and Boris A. Malomed	
Intrinsic flow structure and multifractality in two-dimensional bacterial turbulence (<i>8 pages</i>)	052215
Lipo Wang (王利坡) and Yongxiang Huang (黄永祥)	
Two-dimensional localized chaotic patterns in parametrically driven systems (<i>6 pages</i>)	052216
Deterlino Urzagasti, David Laroze, and Harald Pleiner	
Dynamics of interacting electrons under effect of a Morse potential (<i>10 pages</i>)	052217
J. L. L. dos Santos, M. O. Sales, A. Ranciaro Neto, and F. A. B. F. de Moura	
Dynamics of spiral waves rotating around an obstacle and the existence of a minimal obstacle (<i>7 pages</i>)	052218
Xiang Gao, Xia Feng, Teng-Chao Li, Shixian Qu, Xingang Wang, and Hong Zhang	
Emergence of chaos in starlike networks of dissipative nonlinear oscillators by localized parametric excitations (<i>11 pages</i>)	052219
R. Chacón, A. Martínez García-Hoz, and J. A. Martínez	
Pattern of a confined chemical garden controlled by injection speed (<i>7 pages</i>)	052220
Shu Wagatsuma, Takuro Higashi, Yutaka Sumino, and Ayumi Achiwa	
Networks and Complex Systems	
Simon’s fundamental rich-get-richer model entails a dominant first-mover advantage (<i>7 pages</i>)	052301
Peter Sheridan Dodds, David Rushing Dewhurst, Fletcher F. Hazlehurst, Colin M. Van Oort, Lewis Mitchell, Andrew J. Reagan, Jake Ryland Williams, and Christopher M. Danforth	
Extortion provides alternative routes to the evolution of cooperation in structured populations (<i>7 pages</i>)	052302
Xiongrui Xu, Zhihai Rong, Zhi-Xi Wu, Tao Zhou, and Chi Kong Tse	
General expression for the component size distribution in infinite configuration networks (<i>8 pages</i>)	052303
Ivan Kryven	
Noise focusing in neuronal tissues: Symmetry breaking and localization in excitable networks with quenched disorder (<i>8 pages</i>)	052304
Javier G. Orlandi and Jaume Casademunt	
Optimal cost for strengthening or destroying a given network (<i>8 pages</i>)	052305
Amikam Patron, Reuven Cohen, Daqing Li, and Shlomo Havlin

CONTENTS - *Continued*

PHYSICAL REVIEW E	THIRD SERIES, VOLUME 95, NUMBER 5	MAY 2017
Social contagions on time-varying community networks (<i>8 pages</i>)		052306
Mian-Xin Liu, Wei Wang, Ying Liu, Ming Tang, Shi-Min Cai, and Hai-Feng Zhang		
Simple wealth distribution model causing inequality-induced crisis without external shocks (<i>14 pages</i>)		052307
Henri Benisty		
Language competition in a population of migrating agents (<i>6 pages</i>)		052308
Dorota Lipowska and Adam Lipowski		
Cyclic public goods games: Compensated coexistence among mutual cheaters stabilized by optimized penalty taxation (<i>12 pages</i>)		052309
Christopher Griffin and Andrew Belmonte		
Topology-dependent rationality and quantal response equilibria in structured populations (<i>9 pages</i>)		052310
Sabin Roman and Markus Brede		
Scale-free networks emerging from multifractal time series (<i>9 pages</i>)		052311
Marcello A. Budroni, Andrea Baronchelli, and Romualdo Pastor-Satorras		
Optimizing diffusion in multiplexes by maximizing layer dissimilarity (<i>10 pages</i>)		052312
Alfredo B. Serrano, Jesús Gómez-Gardeñes, and Roberto F. S. Andrade		
Minimum spanning tree filtering of correlations for varying time scales and size of fluctuations (<i>10 pages</i>)		052313
Jarosław Kwapien, Paweł Oświęcimka, Marcin Forczek, and Stanisław Drożdż		
Bounds of memory strength for power-law series (<i>9 pages</i>)		052314
Fangjian Guo, Dan Yang, Zimo Yang, Zhi-Dan Zhao, and Tao Zhou		
Interacting opinion and disease dynamics in multiplex networks: Discontinuous phase transition and nonmonotonic consensus times (<i>20 pages</i>)		052315
Fátima Velásquez-Rojas and Federico Vazquez		
Alliance formation with exclusion in the spatial public goods game (<i>8 pages</i>)		052316
Attila Szolnoki and Xiaojie Chen		
Epidemic extinction paths in complex networks (<i>10 pages</i>)		052317
Jason Hindes and Ira B. Schwartz		
Random walks on activity-driven networks with attractiveness (<i>8 pages</i>)		052318
Laura Alessandretti, Kaiyuan Sun, Andrea Baronchelli, and Nicola Perra		
Entropy of international trades (<i>8 pages</i>)		052319
Chang-Young Oh and D.-S. Lee		
Multiscale model for pedestrian and infection dynamics during air travel (<i>7 pages</i>)		052320
Sirish Namilae, Pierrot Derjany, Anuj Mubayi, Mathew Scotch, and Ashok Srinivasan		

PART B

Biological Physics

Torque and buckling in stretched intertwined double-helix DNAs (<i>16 pages</i>)	052401
Sumitabha Brahmachari and John F. Marko	

(Continued)

☞	Designing nucleosomal force sensors (<i>6 pages</i>)	052402
	M. Tompitak, L. de Bruin, B. Eslami-Mossallam, and H. Schiessel	
	Robustness of synthetic oscillators in growing and dividing cells (<i>12 pages</i>)	052403
	Joris Paijmans, David K. Lubensky, and Pieter Rein ten Wolde	
	Delayed bet-hedging resilience strategies under environmental fluctuations (<i>8 pages</i>)	052404
	Masaki Ogura, Masashi Wakaiki, Harvey Rubin, and Victor M. Preciado	
	Viral self-assembly pathway and mechanical stress relaxation (<i>5 pages</i>)	052405
	Martin Castelnovo	
	Stochastic lattice model of synaptic membrane protein domains (<i>23 pages</i>)	052406
	Yiwei Li, Osman Kahraman, and Christoph A. Haselwandter	
	Lateral diffusion induced by active proteins in a biomembrane (<i>10 pages</i>)	052407
	Yuto Hosaka, Kento Yasuda, Ryuichi Okamoto, and Shigeyuki Komura	
	Experimental comparison of forces resisting viral DNA packaging and driving DNA ejection (<i>5 pages</i>)	052408
	Nicholas Keller, Zachary T. Berendsen, Paul J. Jardine, and Douglas E. Smith	
	Analytical solution of the steady membrane voltage fluctuation caused by a single ion channel (<i>8 pages</i>)	052409
	Jia-Zeng Wang and Rui-Zhen Wang	
	Anticipated synchronization in neuronal circuits unveiled by a phase-response-curve analysis (<i>7 pages</i>)	052410
	Fernanda S. Matias, Pedro V. Carelli, Claudio R. Mirasso, and Mauro Copelli	
☞	Model of the best-of- N nest-site selection process in honeybees (<i>15 pages</i>)	052411
	Andreagiovanni Reina, James A. R. Marshall, Vito Trianni, and Thomas Bose	
	Symplectic and antiplectic waves in an array of beating cilia attached to a closed body (<i>5 pages</i>)	052412
	Aref Ghorbani and Ali Najafi	
	Torque-coupled thermodynamic model for F_oF_1 -ATPase (<i>8 pages</i>)	052413
	Guangkuo Ai, Pengfei Liu, and Hao Ge	
	Actin growth profile in clathrin-mediated endocytosis (<i>17 pages</i>)	052414
	D. J. Tweten, P. V. Bayly, and A. E. Carlsson	
	Compressive elasticity of polydisperse biopolymer gels (<i>11 pages</i>)	052415
	Xinpeng Xu and Samuel A. Safran	
	β -Cyclodextrin polymer binding to DNA: Modulating the physicochemical parameters (<i>6 pages</i>)	052416
	J. C. B. Rocha, E. F. Silva, M. F. Oliveira, F. B. Sousa, A. V. N. C. Teixeira, and M. S. Rocha	
	Functional window of the avian compass (<i>8 pages</i>)	052417
	Vishvendra Singh Poonia, Kiran Kondabagil, Dipankar Saha, and Swaroop Ganguly	
	Uniform description of polymer ejection dynamics from capsid with and without hydrodynamics (<i>12 pages</i>)	052418
	J. Piili, P. M. Suhonen, and R. P. Linna	
	Measurements and simulations of microscopic damage to DNA in water by 30 keV electrons: A general approach applicable to other radiation sources and biological targets (<i>8 pages</i>)	052419
	Marc Benjamin Hahn, Susann Meyer, Hans-Jörg Kunte, Tihomir Solomun, and Heinz Sturm	

(Continued)

Polymers

- Exact solution for the force-extension relation of a semiflexible polymer under compression (*12 pages*) 052501
Christina Kurzthaler and Thomas Franosch
- Compressive response and helix formation of a semiflexible polymer confined in a nanochannel (*6 pages*) 052502
Yumino Hayase, Takahiro Sakaue, and Hiizu Nakanishi
- Measuring geometric frustration in twisted inextensible filament bundles (*7 pages*) 052503
Andreea Panaitescu, Gregory M. Grason, and Arshad Kudrolli

Colloids, Complex Fluids, and Active Matter

- Describing magnetorheology under a colloidal glass approach (*9 pages*) 052601
J. P. Segovia-Gutiérrez, J. de Vicente, Antonio M. Puertas, and R. Hidalgo-Alvarez
- Fluidization and wall slip of soft glassy materials by controlled surface roughness (*6 pages*) 052602
Ladislav Derzsi, Daniele Filippi, Giampaolo Mistura, Matteo Pierno, Matteo Lulli, Mauro Sbragaglia, Massimo Bernaschi, and Piotr Garstecki
- Recovery of mechanical pressure in a gas of underdamped active dumbbells with Brownian noise (*13 pages*) 052603
Marc Joyeux
- Role of the displacement current on Warburg-type behavior (*13 pages*) 052604
I. Lelidis and G. Barbero
- Tracer diffusion in active suspensions (*8 pages*) 052605
Eric W. Burkholder and John F. Brady
- Contractile actuation and dynamical gel assembly of paramagnetic filaments in fast precessing fields (*8 pages*) . . . 052606
Joshua M. Dempster, Pablo Vázquez-Montejo, and Monica Olvera de la Cruz
- Phase diagram and aggregation dynamics of a monolayer of paramagnetic colloids (*12 pages*) 052607
An T. Pham, Yuan Zhuang, Paige Detwiler, Joshua E. S. Socolar, Patrick Charbonneau, and Benjamin B. Yellen
- Study of dynamic heterogeneity of an active particle system (*11 pages*) 052608
Huai Ding, Huijun Jiang, and Zhonghuai Hou

Liquid Crystals

- Diffusion of chiral molecules and propagation of structural chirality in anisotropic liquids (*8 pages*) 052701
Mireille Quémener, Tigran Galstian, Thomas Marmin, Victoria Laroche, and Yves L. Dory
- Role of length polydispersity in the phase behavior of freely rotating hard-rectangle fluids (*14 pages*) 052702
Ariel Díaz-De Armas and Yuri Martínez-Ratón
- Heterogeneous colloidal particles immersed in a liquid crystal (*12 pages*) 052703
Setarehalsadat Changizrezaei and Colin Denniston
- Influence of liquid crystalline phases on the tunability of a random laser (*9 pages*) 052704
José Trull, Josep Salud, Sergio Diez-Berart, and David O. López

(Continued)

Highly efficient optical director reorientation of liquid-crystalline polymer induced by dye additives (6 pages) . . .	052705
I. A. Budagovsky, V. N. Ochkin, S. A. Shvetsov, A. S. Zolot'ko, A. Yu. Bobrovsky, N. I. Boiko, and V. P. Shibaev	
Comparative study of the anchoring strength of reactive mesogens and industrial polyimides used for the alignment of liquid crystals (7 pages)	052706
T. Sergan, I. Dozov, V. Sergan, and R. Voss	
Films and Interfaces	
Hydrodynamic theory of freezing: Nucleation and polycrystalline growth (8 pages)	052801
Frigyes Podmaniczky, Gyula I. Tóth, György Tegze, and László Gránásky	
Spreading law on a completely wettable spherical substrate: The energy balance approach (6 pages)	052802
Masao Iwamatsu	
Enhanced drainage and thinning of liquid films between bubbles and solids that support surface waves (8 pages)	052803
Amihai Horesh, Matvey Morozov, and Ofer Manor	
Relation between the porosity and tortuosity of a membrane formed by disconnected irregular pores and the spatial diffusion coefficient of the Fick-Jacobs model (10 pages)	052804
Aldo Ledesma-Durán, S. I. Hernández, and Iván Santamaría-Holek	
Contact angles of a drop pinned on an incline (6 pages)	052805
Joël De Coninck, François Dunlop, and Thierry Huillet	
Granular Materials	
☞ General scaling relations for locomotion in granular media (8 pages)	052901
James Slonaker, D. Carrington Motley, Qiong Zhang, Stephen Townsend, Carmine Senatore, Karl Iagnemma, and Ken Kamrin	
Statistical characterization of microstructure of packings of polydisperse hard cubes (14 pages)	052902
Hessam Malmir, Muhammad Sahimi, and M. Reza Rahimi Tabar	
☞ Shear banding, discontinuous shear thickening, and rheological phase transitions in athermally sheared frictionless disks (24 pages)	052903
Daniel Vågberg, Peter Olsson, and S. Teitel	
Role of particle size in the kinematic properties of silo flow (8 pages)	052904
Diego Gella, Diego Maza, and Iker Zuriguel	
Affine and topological structural entropies in granular statistical mechanics: Explicit calculations and equation of state (13 pages)	052905
Shahar Amitai and Raphael Blumenfeld	
Solid Mechanics	
Coarse graining atomistic simulations of plastically deforming amorphous solids (15 pages)	053001
Adam R. Hinkle, Chris H. Rycroft, Michael D. Shields, and Michael L. Falk	
Forces and torques on rigid inclusions in an elastic environment: Resulting matrix-mediated interactions, displacements, and rotations (21 pages)	053002
Mate Puljiz and Andreas M. Menzel	

(Continued)

CONTENTS - *Continued*

PHYSICAL REVIEW E	THIRD SERIES, VOLUME 95, NUMBER 5	MAY 2017
Strain tensor selection and the elastic theory of incompatible thin sheets (<i>16 pages</i>)		053003
Oz Oshri and Haim Diamant		
Crack propagation through disordered materials as a depinning transition: A critical test of the theory (<i>12 pages</i>)		053004
Laurent Ponson and Nadjime Pindra		
Time-dependent breakdown of fiber networks: Uncertainty of lifetime (<i>10 pages</i>)		053005
Amanda Mattsson and Tetsu Uesaka		
Fluid Dynamics		
Stability of viscous film flow coating the interior of a vertical tube with a porous wall (<i>10 pages</i>)		053101
Rong Liu and Zijang Ding		
Mean-Lagrangian formalism and covariance of fluid turbulence (<i>11 pages</i>)		053102
Taketo Arik		
Wave propagation reversal for wavy vortices in wide-gap counter-rotating cylindrical Couette flow (<i>9 pages</i>)		053103
S. Altmeyer and Richard M. Lueptow		
Radiation dynamics of a cavitation bubble in a liquid-filled cavity surrounded by an elastic solid (<i>7 pages</i>)		053104
Catherine Drysdale, Alexander A. Doinikov, and Philippe Marmottant		
Numerical simulations of vesicle and bubble dynamics in two-dimensional four-roll mill flows (<i>14 pages</i>)		053105
Yongsam Kim, Ming-Chih Lai, and Yunchang Seol		
Plateau-Rayleigh instability in solids is a simple phase separation (<i>8 pages</i>)		053106
Chen Xuan and John Biggins		
Hydrodynamics of viscous inhalant flows (<i>9 pages</i>)		053107
Aaron C. True and John P. Crimaldi		
Finite-thickness effects on the Rayleigh-Taylor instability in accelerated elastic solids (<i>9 pages</i>)		053108
S. A. Piriz, A. R. Piriz, and N. A. Tahir		
Relaxation of twist helicity in the cascade process of linked quantum vortices (<i>6 pages</i>)		053109
Simone Zuccher and Renzo L. Ricca		
Taylor cone and electrospinning at a free surface of superfluid helium charged from below (<i>9 pages</i>)		053110
P. Moroshkin, P. Leiderer, Th. B. Möller, and K. Kono		
Wetting and dewetting processes in the axial retraction of liquid filaments (<i>16 pages</i>)		053111
Pablo D. Ravazzoli, Ingrid Cuellar, Alejandro G. González, and Javier A. Diez		
Evidence for equivalence of diffusion processes of passive scalar and magnetic fields in anisotropic Navier-Stokes turbulence (<i>6 pages</i>)		053112
E. Jurčisinová and M. Jurčisin		
Experimental velocity study of non-Boussinesq Rayleigh-Bénard convection (<i>12 pages</i>)		053113
Valentina Valori, Gerrit Elsinga, Martin Rohde, Mark Tummars, Jerry Westerweel, and Tim van der Hagen		
Thermal Rayleigh-Marangoni convection in a three-layer liquid-metal-battery model (<i>23 pages</i>)		053114
Thomas Köllner, Thomas Boeck, and Jörg Schumacher
