THIRD SERIES, VOLUME 97, NUMBER 3
PARTS A AND B

CONTENTS

MARCH 2018

The Table of Contents is a total listing of Parts A and B.
Part A consists of pages 030001–032320, and Part B pages 032401–039901(E).

PART A

EDITORIALS AND ANNOUNCEMENTS

Announcement: The Irwin Oppenheim Award (*1 page*) 030001

RAPID COMMUNICATIONS

Statistical Physics

Efficient thermal diode with ballistic spacer (*5 pages*) 030101(R)
Shunda Chen, Davide Donadio, Giuliano Benenti, and Giulio Casati

Glassy phase in quenched disordered crystalline membranes (*5 pages*) 030102(R)
O. Coquand, K. Essafi, J.-P. Kownacki, and D. Mouhanna

Nonequilibrium two-dimensional Ising model with stationary uphill diffusion (*5 pages*) 030103(R)
Matteo Colangeli, Cristian Giardinà, Claudio Giberti, and Cecilia Vernia

Different approach to the modeling of nonfree particle diffusion (*5 pages*) 030104(R)
Niels Buhl

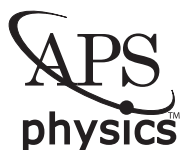

Nonlinear Dynamics and Chaos

Periodic sequence of stabilized wave segments in an excitable medium (*5 pages*) 030201(R)
V. S. Zykov and E. Bodenschatz

Local box-counting dimensions of discrete quantum eigenvalue spectra: Analytical connection to quantum spectral statistics (*5 pages*) 030202(R)
Jamal Sakhr and John M. Nieminen

Networks and Complex Systems

Inhibition delay increases neural network capacity through Stirling transform (*4 pages*) 030301(R)
Alain Nogaret and Alastair King

Copyright 2018 by American Physical Society

2470-0045(201803)97:3:A;1-6

(Continued)

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

ARTICLES

Statistical Physics

Shielding property for thermal equilibrium states in the quantum Ising model (<i>9 pages</i>).....	032101
N. S. Möller, A. L. de Paula Jr., and R. C. Drumond	
Heat transport in oscillator chains with long-range interactions coupled to thermal reservoirs (<i>9 pages</i>).....	032102
Stefano Iubini, Pierfrancesco Di Cintio, Stefano Lepri, Roberto Livi, and Lapo Casetti	
Size effects in finite systems with long-range interactions (<i>10 pages</i>).....	032103
E. S. Loscar and C. M. Horowitz	
Fractal dimension of interfaces in Edwards-Anderson spin glasses for up to six space dimensions (<i>6 pages</i>).....	032104
Wenlong Wang, M. A. Moore, and Helmut G. Katzgraber	
Absorbing phase transitions in deterministic fixed-energy sandpile models (<i>12 pages</i>).....	032105
Su-Chan Park (박수찬)	
Ferromagnetic Potts models with multisite interaction (<i>7 pages</i>).....	032106
Nir Schreiber, Reuven Cohen, and Simi Haber	
Thermal decay of a metastable state: Influence of rescattering on the quasistationary dynamical rate (<i>10 pages</i>)...	032107
M. V. Chushnyakova and I. I. Gontchar	
Statistical investigation of avalanches of three-dimensional small-world networks and their boundary and bulk cross-sections (<i>11 pages</i>).....	032108
M. N. Najafi and H. Dashti-Naserabadi	
Mapping of uncertainty relations between continuous and discrete time (<i>5 pages</i>).....	032109
Davide Chiuchì and Simone Pigolotti	
Derivation of Markov processes that violate detailed balance (<i>19 pages</i>).....	032110
Julian Lee	
Effect of multiplicative noise on stationary stochastic process (<i>9 pages</i>).....	032112
A. V. Kargovsky, A. Yu. Chikishev, and O. A. Chichigina	
Unifying model for random matrix theory in arbitrary space dimensions (<i>8 pages</i>).....	032113
Giovanni M. Cicuta, Johannes Krausser, Rico Milkus, and Alessio Zaccane	
Zero-crossing statistics for non-Markovian time series (<i>8 pages</i>).....	032114
Markus Nyberg, Ludvig Lizana, and Tobias Ambjörnsson	
Least-rattling feedback from strong time-scale separation (<i>14 pages</i>).....	032115
Pavel Chvykov and Jeremy England	
Cooperativity in plastic crystals (<i>9 pages</i>).....	032116
Marco Pieruccini and Elpidio Tombari	
Emergence of nonwhite noise in Langevin dynamics with magnetic Lorentz force (<i>7 pages</i>).....	032117
Hyun-Myung Chun, Xavier Durang, and Jae Dong Noh	
Statistical physics of medical diagnostics: Study of a probabilistic model (<i>11 pages</i>).....	032118
Alireza Mashaghi and Abolfazl Ramezanpour	

(Continued)

Deep neural networks for direct, featureless learning through observation: The case of two-dimensional spin models (<i>10 pages</i>)	032119
Kyle Mills and Isaac Tamblyn	
Jamming and condensation in one-dimensional driven flow (<i>10 pages</i>)	032120
Hyungjoon Soh, Meesoon Ha, and Hawoong Jeong	
Limits of the memory coefficient in measuring correlated bursts (<i>8 pages</i>)	032121
Hang-Hyun Jo and Takayuki Hiraoka	
Sampling rare fluctuations of discrete-time Markov chains (<i>10 pages</i>)	032122
Stephen Whitelam	
Rare behavior of growth processes via umbrella sampling of trajectories (<i>15 pages</i>)	032123
Katherine Klymko, Phillip L. Geissler, Juan P. Garrahan, and Stephen Whitelam	
Large-deviation theory for diluted Wishart random matrices (<i>9 pages</i>)	032124
Isaac Pérez Castillo and Fernando L. Metz	
Nonequilibrium forces following quenches in active and thermal matter (<i>13 pages</i>)	032125
Christian M. Rohwer, Alexandre Solon, Mehran Kardar, and Matthias Krüger	
Fractional superstatistics from a kinetic approach (<i>7 pages</i>)	032126
Kamel Ourabah and Mouloud Tribeche	
Brownian motion surviving in the unstable cubic potential and the role of Maxwell's demon (<i>12 pages</i>)	032127
Luca Ornigotti, Artem Ryabov, Viktor Holubec, and Radim Filip	
Distribution of diameters for Erdős-Rényi random graphs (<i>8 pages</i>)	032128
A. K. Hartmann and M. Mézard	
Diffusive instabilities in a hyperbolic activator-inhibitor system with superdiffusion (<i>13 pages</i>)	032129
Alain Mvogo, Jorge E. Macías-Díaz, and Timoléon Crépin Kofané	
Asymmetric simple exclusion process with position-dependent hopping rates: Phase diagram from boundary-layer analysis (<i>10 pages</i>)	032130
Sutapa Mukherji	
Phase transitions in a system of hard Y-shaped particles on the triangular lattice (<i>10 pages</i>)	032131
Dipanjan Mandal, Trisha Nath, and R. Rajesh	
Voronoi glass-forming liquids: A structural study (<i>13 pages</i>)	032132
C. Ruscher, J. Baschnagel, and J. Farago	
Random matrices and condensation into multiple states (<i>12 pages</i>)	032133
Sina Sadeghi and Andreas Engel	
Non-Markovian dynamics of fermionic and bosonic systems coupled to several heat baths (<i>12 pages</i>)	032134
A. A. Hovhannisyan, V. V. Sargsyan, G. G. Adamian, N. V. Antonenko, and D. Lacroix	
Relaxation dynamics of closed diffusive systems with infinitesimal Langmuir kinetics (<i>6 pages</i>)	032135
Jun Sato and Katsuhiro Nishinari	
On the number of Bose-selected modes in driven-dissipative ideal Bose gases (<i>13 pages</i>)	032136
Alexander Schnell, Roland Ketzmerick, and André Eckardt	

(Continued)

Analytical method for analysis of electromagnetic scattering from inhomogeneous spherical structures using duality principles (<i>9 pages</i>).....	032137
M. Kiani, A. Abdolali, and M. Safari	
Modeling long correlation times using additive binary Markov chains: Applications to wind generation time series (<i>13 pages</i>).....	032138
Juliane Weber, Christopher Zachow, and Dirk Witthaut	
Critical properties of unlimited gliding: Unexpected flocking behavior driven by the exchange of information (<i>7 pages</i>).....	032139
Marta Bigus-Kwiatkowska, Agata Fronczak, and Piotr Fronczak	
Frustration-induced internal stresses are responsible for quasilocalized modes in structural glasses (<i>4 pages</i>)	032140
Edan Lerner and Eran Bouchbinder	
Nonlinear Dynamics and Chaos	
Attractor hopping between polarization dynamical states in a vertical-cavity surface-emitting laser subject to parallel optical injection (<i>13 pages</i>)	032201
Florian Denis-le Coarer, Ana Quirce, Angel Valle, Luis Pesquera, Miguel A. Rodríguez, Krassimir Panajotov, and Marc Sciamanna	
Transition between inverse and direct energy cascades in multiscale optical turbulence (<i>7 pages</i>)	032202
V. M. Malkin and N. J. Fisch	
Investigation of a chaotic thermostat (<i>10 pages</i>).....	032203
G. J. Morales	
Spatial solitons and stability in the one-dimensional and the two-dimensional generalized nonlinear Schrödinger equation with fourth-order diffraction and parity-time-symmetric potentials (<i>6 pages</i>).....	032204
C. G. L. Tiofack, F. I. Ndzana, A. Mohamadou, and T. C. Kofane	
Transition from normal to ballistic diffusion in a one-dimensional impact system (<i>9 pages</i>).....	032205
André L. P. Livorati, Tiago Kroetz, Carl P. Dettmann, Iberê L. Caldas, and Edson D. Leonel	
Information-theoretic model selection for optimal prediction of stochastic dynamical systems from data (<i>12 pages</i>)	032206
David Darmon	
Distinct collective states due to trade-off between attractive and repulsive couplings (<i>10 pages</i>).....	032207
K. Sathiyadevi, V. K. Chandrasekar, D. V. Senthilkumar, and M. Lakshmanan	
Exponentially decaying interaction potential of cavity solitons (<i>5 pages</i>).....	032208
Shayesteh Rahmani Anbardan, Cristina Rimoldi, Reza Kheradmand, Giovanna Tissoni, and Franco Prati	
Amplitude-dependent topological edge states in nonlinear phononic lattices (<i>16 pages</i>).....	032209
Raj Kumar Pal, Javier Vila, Michael Leamy, and Massimo Ruzzene	
Autoresonant excitation of Bose-Einstein condensates (<i>9 pages</i>)	032210
S. V. Batalov, A. G. Shagalov, and L. Friedland	
Constructing Hopf bifurcation lines for the stability of nonlinear systems with two time delays (<i>7 pages</i>)	032211
Romain Modeste Nguimdo	
Dark gap solitons in exciton-polariton condensates in a periodic potential (<i>5 pages</i>).....	032212
Szu-Cheng Cheng and Ting-Wei Chen	

(Continued)

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 97, NUMBER 3

MARCH 2018

Clusters in nonsmooth oscillator networks (<i>19 pages</i>)	032213
Rachel Nicks, Lucie Chambon, and Stephen Coombes	
Discretization-dependent model for weakly connected excitable media (<i>12 pages</i>)	032214
Pedro André Arroyo, Sergio Alonso, and Rodrigo Weber dos Santos	
Extreme events and single-pulse spatial patterns observed in a self-pulsing all-solid-state laser (<i>7 pages</i>)	032215
Carlos Bonazzola, Alejandro Hnilo, Marcelo Kovalsky, and Jorge Tredicce	
Spatiotemporal dynamics of the covariant Lyapunov vectors of chaotic convection (<i>11 pages</i>)	032216
M. Xu and M. R. Paul	
Floquet states of a kicked particle in a singular potential: Exponential and power-law profiles (<i>8 pages</i>)	032217
Sanku Paul and M. S. Santhanam	
Hydrodynamic optical soliton tunneling (<i>8 pages</i>)	032218
P. Sprenger, M. A. Hoefer, and G. A. El	
Directed motion of spheres induced by unbiased driving forces in viscous fluids beyond the Stokes' law regime (<i>8 pages</i>)	032219
Jesús Casado-Pascual	
Networks and Complex Systems	
Algorithmic detectability threshold of the stochastic block model (<i>14 pages</i>)	032301
Tatsuro Kawamoto	
Exact analytical solution of irreversible binary dynamics on networks (<i>9 pages</i>)	032302
Edward Laurence, Jean-Gabriel Young, Sergey Melnik, and Louis J. Dubé	
Tuning the overlap and the cross-layer correlations in two-layer networks: Application to a susceptible-infectious-recovered model with awareness dissemination (<i>13 pages</i>)	032303
David Juher and Joan Saldaña	
Collective conflict resolution in groups on the move (<i>17 pages</i>)	032304
Itai Pinkoviezky, Iain D. Couzin, and Nir S. Gov	
Optimal stabilization of Boolean networks through collective influence (<i>9 pages</i>)	032305
Jiannan Wang, Sen Pei, Wei Wei, Xiangnan Feng, and Zhiming Zheng	
Group percolation in interdependent networks (<i>11 pages</i>)	032306
Zexun Wang, Dong Zhou, and Yanqing Hu	
Master stability functions reveal diffusion-driven pattern formation in networks (<i>18 pages</i>)	032307
Andreas Brechtel, Philipp Gramlich, Daniel Ritterskamp, Barbara Drossel, and Thilo Gross	
Interplay between cost and benefits triggers nontrivial vaccination uptake (<i>6 pages</i>)	032308
Benjamin Steinegger, Alessio Cardillo, Paolo De Los Rios, Jesús Gómez-Gardeñes, and Alex Arenas	
Geometric evolution of complex networks with degree correlations (<i>10 pages</i>)	032309
Charles Murphy, Antoine Allard, Edward Laurence, Guillaume St-Onge, and Louis J. Dubé	
 Transition to collective oscillations in finite Kuramoto ensembles (<i>10 pages</i>)	032310
Franziska Peter and Arkady Pikovsky

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 97, NUMBER 3

MARCH 2018

Individual heterogeneity generating explosive system network dynamics (<i>6 pages</i>).....	032311
Pedro D. Manrique and Neil F. Johnson	
Critical neural networks with short- and long-term plasticity (<i>7 pages</i>).....	032312
L. Michiels van Kessenich, M. Luković, L. de Arcangelis, and H. J. Herrmann	
Using persistent homology to reveal hidden covariates in systems governed by the kinetic Ising model (<i>14 pages</i>).....	032313
Gard Spreemann, Benjamin Dunn, Magnus Bakke Botnan, and Nils A. Baas	
Renormalization-group study of the Nagel-Schreckenberg model (<i>8 pages</i>).....	032314
Han Kheng Teoh and Ee Hou Yong	
Universality and correlations in individuals wandering through an online extremist space (<i>7 pages</i>).....	032315
Z. Cao, M. Zheng, Y. Vorobyeva, C. Song, and N. F. Johnson	
Complex network view of evolving manifolds (<i>13 pages</i>).....	032316
Diamantino C. da Silva, Ginestra Bianconi, Rui A. da Costa, Sergey N. Dorogovtsev, and José F. F. Mendes	
Sparse dynamical Boltzmann machine for reconstructing complex networks with binary dynamics (<i>21 pages</i>).....	032317
Yu-Zhong Chen and Ying-Cheng Lai	
Detection of intensity bursts using Hawkes processes: An application to high-frequency financial data (<i>14 pages</i>).....	032318
Marcello Rambaldi, Vladimir Filimonov, and Fabrizio Lillo	
Effect of form of obstacle on speed of crowd evacuation (<i>9 pages</i>).....	032319
Ryosuke Yano	
Universal principles governing multiple random searchers on complex networks: The logarithmic growth pattern and the harmonic law (<i>9 pages</i>).....	032320
Tongfeng Weng, Jie Zhang, Michael Small, Bahareh Harandizadeh, and Pan Hui	

PART B

Biological Physics

Post-transcriptional bursting in genes regulated by small RNA molecules (<i>9 pages</i>).....	032401
Guillermo Rodrigo	
 Impact of hydrodynamic interactions on protein folding rates depends on temperature (<i>17 pages</i>).....	032402
Fabio C. Zegarar, Dirar Homouz, Yossi Eliaz, Andrei G. Gasic, and Margaret S. Cheung	
Simple and universal model for electron-impact ionization of complex biomolecules (<i>7 pages</i>).....	032403
Hong Qi Tan, Zhaohong Mi, and Andrew A. Bettiol	
Effect of ac electric field on the dynamics of a vesicle under shear flow in the small deformation regime (<i>20 pages</i>).....	032404
Kumari Priti Sinha and Rochish M. Thakkar	
Optimal entrainment of circadian clocks in the presence of noise (<i>23 pages</i>).....	032405
Michele Monti, David K. Lubensky, and Pieter Rein ten Wolde	
Early-warning signals of critical transition: Effect of extrinsic noise (<i>8 pages</i>).....	032406
Shanshan Qin and Chao Tang	

(Continued)

Slowdown of surface diffusion during early stages of bacterial colonization (<i>8 pages</i>).....	032407
T. Vourc'h, H. Peerhossaini, J. Léopoldès, A. Méjean, F. Chauvat, and C. Cassier-Chauvat	
Actin filaments growing against an elastic membrane: Effect of membrane tension (<i>13 pages</i>).....	032408
Raj Kumar Sadhu and Sakuntala Chatterjee	
☞ Chemical event chain model of coupled genetic oscillators (<i>11 pages</i>).....	032409
David J. Jörg, Luis G. Morelli, and Frank Jülicher	
Assay based on electrical impedance spectroscopy to discriminate between normal and cancerous mammalian cells (<i>10 pages</i>).....	032410
Fabián Eduardo Giana, Fabián José Bonetto, and Mariela Inés Bellotti	
Asymmetry in cilia configuration induces hydrodynamic phase locking (<i>10 pages</i>).....	032411
Keiji Okumura, Seiya Nishikawa, Toshihiro Omori, Takuji Ishikawa, and Atsuko Takamatsu	
Energy required to pinch a DNA plectoneme (<i>12 pages</i>).....	032412
Céline Barde, Nicolas Destainville, and Manoel Manghi	
☞ How nonuniform contact profiles of T cell receptors modulate thymic selection outcomes (<i>9 pages</i>).....	032413
Hanrong Chen, Arup K. Chakraborty, and Mehran Kardar	
Determination of prestress and elastic properties of virus capsids (<i>13 pages</i>).....	032414
Ankush Aggarwal	
How directional mobility affects coexistence in rock-paper-scissors models (<i>6 pages</i>).....	032415
P. P. Avelino, D. Bazeia, L. Losano, J. Menezes, B. F. de Oliveira, and M. A. Santos	
Modeling persistence of motion in a crowded environment: The diffusive limit of excluding velocity-jump processes (<i>18 pages</i>).....	032416
Enrico Gavagnin and Christian A. Yates	
Encounter times of chromatin loci influenced by polymer decondensation (<i>8 pages</i>).....	032417
A. Amitai and D. Holcman	
☞ Normal stresses in semiflexible polymer hydrogels (<i>11 pages</i>).....	032418
M. Vahabi, Bart E. Vos, Henri C. G. de Cagny, Daniel Bonn, Gijsje H. Koenderink, and F. C. MacKintosh	
Reconstructing free-energy landscapes for nonequilibrium periodic potentials (<i>6 pages</i>).....	032419
N. J. López-Alamilla, Michael W. Jack, and K. J. Challis	
Optimal methylation noise for best chemotactic performance of <i>E. coli</i> (<i>15 pages</i>).....	032420
Subrata Dev and Sakuntala Chatterjee	
Evaluation of bending modulus of lipid bilayers using undulation and orientation analysis (<i>12 pages</i>).....	032421
Adarsh K. Chaurasia, Andrew M. Rukangu, Michael K. Philen, Gary D. Seidel, and Eric C. Freeman	
Effects of nucleosome stability on remodeler-catalyzed repositioning (<i>19 pages</i>).....	032422
Aaron M. Morgan, Sarah E. LeGresley, Koan Briggs, Gada Al-Ani, and Christopher J. Fischer	
Polymers	
Electrostatic stiffening and induced persistence length for coassembled molecular bottlebrushes (<i>13 pages</i>).....	032501
Ingeborg M. Storm, Martien A. Cohen Stuart, Renko de Vries, and Frans A. M. Leermakers	

(Continued)

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 97, NUMBER 3

MARCH 2018

Universal size properties of a star-ring polymer structure in disordered environments (<i>10 pages</i>).....	032502
K. Haydukivska and V. Blavatska	
Polyelectrolyte brush bilayers in weak interpenetration regime: Scaling theory and molecular dynamics simulations (<i>8 pages</i>).....	032503
Parth Rakesh Desai, Shayandev Sinha, and Siddhartha Das	
Star polymers as unit cells for coarse-graining cross-linked networks (<i>9 pages</i>).....	032504
Taras Y. Molotilin, Salim R. Maduar, and Olga I. Vinogradova	
Engineering single-polymer micelle shape using nonuniform spontaneous surface curvature (<i>24 pages</i>).....	032505
Brian Moths and T. A. Witten	
Filamentary structures that self-organize due to adhesion (<i>7 pages</i>).....	032506
A. Sengab and R. C. Picu	
Tuning relaxation dynamics and mechanical properties of polymer films of identical thickness (<i>11 pages</i>).....	032507
Marwa Kchaou, Pierre Alcouffe, Sivasurender Chandran, Philippe Cassagnau, Günter Reiter, and Samer Al Akhrass	
Depletion interaction between colloids mediated by an athermal polymer blend (<i>10 pages</i>).....	032508
A. I. Chervanyov	
Colloids, Complex Fluids, and Active Matter	
Paramagnetic colloids: Chaotic routes to clusters and molecules (<i>8 pages</i>).....	032601
Hamed Abdi, Rasam Soheilian, Randall M. Erb, and Craig E. Maloney	
Soft inclusion in a confined fluctuating active gel (<i>14 pages</i>).....	032602
Amit Singh Vishen, J.-F. Rupprecht, G. V. Shivashankar, J. Prost, and Madan Rao	
Self-driven particles in linear flows and trapped in a harmonic potential (<i>7 pages</i>).....	032603
Mario Sandoval, Julio C. Hidalgo-Gonzalez, and Jose I. Jimenez-Aquino	
Active processes in one dimension (<i>10 pages</i>).....	032604
Thibaut Demaerel and Christian Maes	
Depletion zones and crystallography on pinched spheres (<i>6 pages</i>).....	032605
Jingyuan Chen, Xiangjun Xing, and Zhenwei Yao	
Active Brownian particles near straight or curved walls: Pressure and boundary layers (<i>9 pages</i>).....	032606
Ayhan Duzgun and Jonathan V. Selinger	
Fluctuating nonlinear hydrodynamics of flocking (<i>8 pages</i>).....	032607
Sunil Kumar Yadav and Shankar P. Das	
Temperature effects on drift of suspended single-domain particles induced by the Magnus force (<i>9 pages</i>).....	032608
S. I. Denisov, T. V. Lyutyy, V. V. Reva, and A. S. Yermolenko	
Yielding of a model glass former: An interpretation with an effective system of icosahedra (<i>12 pages</i>).....	032609
Rhianon Pinney, Tanniemola B. Liverpool, and C. Patrick Royall	
Magnetic susceptibility, nanorheology, and magnetoviscosity of magnetic nanoparticles in viscoelastic environments (<i>11 pages</i>).....	032610
Patrick Ilg and Apostolos E. A. S. Evangelopoulos	

(Continued)

Reynolds-number-dependent dynamical transitions on hydrodynamic synchronization modes of externally driven colloids (<i>12 pages</i>)	032611
---	--------

Norihiro Oyama, Kosuke Teshigawara, John Jairo Molina, Ryoichi Yamamoto, and Takashi Taniguchi

Liquid Crystals

Modeling deformation and chaining of flexible shells in a nematic solvent with finite elements on an adaptive moving mesh (<i>7 pages</i>).....	032701
---	--------

Andrew DeBenedictis, Timothy J. Atherton, Andrea L. Rodarte, and Linda S. Hirst

<i>N</i> -SmA-SmC phase transitions probed by a pair of elastically bound colloids (<i>6 pages</i>)	032702
---	--------

Muhammed Rasi M, K. P. Zuhail, Arun Roy, and Surajit Dhara

Tunable hybrid optical modes in a bounded cholesteric liquid crystal with a twist defect (<i>5 pages</i>).....	032703
--	--------

Maxim V. Pyatnov, Stepan Ya. Vetrov, and Ivan V. Timofeev

Director gliding in a nematic liquid crystal layer: Quantitative comparison with experiments (<i>11 pages</i>).....	032704
---	--------

E. Mema, L. Kondic, and L. J. Cummings

Electroclinic effect in the chiral lamellar α phase of a lyotropic liquid crystal (<i>8 pages</i>)	032705
---	--------

Marc D. Harjung and Frank Giesselmann

Films and Interfaces

Radial restricted solid-on-solid and etching interface-growth models (<i>5 pages</i>).....	032801
--	--------

Sidiney G. Alves

Granular Materials

Force-chain evolution in a two-dimensional granular packing compacted by vertical tappings (<i>10 pages</i>).....	032901
---	--------

Naoki Iikawa, M. M. Bandi, and Hiroaki Katsuragi

Dimension dependence of clustering dynamics in models of ballistic aggregation and freely cooling granular gas (<i>11 pages</i>).....	032902
---	--------

Subhajit Paul and Subir K. Das

Solid Mechanics

Local yield stress statistics in model amorphous solids (<i>13 pages</i>).....	033001
--	--------

Armand Barbot, Matthias Lerbinger, Anier Hernandez-Garcia, Reinaldo García-García, Michael L. Falk, Damien Vandembroucq, and Sylvain Patinet

Universal avalanche statistics and triggering close to failure in a mean-field model of rheological fracture (<i>14 pages</i>).....	033002
---	--------

Jordi Baró and Jörn Davidsen

Fluid Dynamics

Statistical symmetry restoration in fully developed turbulence: Renormalization group analysis of two models (<i>17 pages</i>)	033101
--	--------

N. V. Antonov, N. M. Gulitskiy, M. M. Kostenko, and A. V. Malyshev

Heavy inertial particles in turbulent flows gain energy slowly but lose it rapidly (<i>6 pages</i>)	033102
---	--------

Akshay Bhatnagar, Anupam Gupta, Dhruvaditya Mitra, and Rahul Pandit

(Continued)

Revised model for the radiation force exerted by standing surface acoustic waves on a rigid cylinder (<i>10 pages</i>)...	033103
Shen Liang and Wang Chaohui	
Relation between boundary slip mechanisms and waterlike fluid behavior (<i>8 pages</i>).....	033104
Patricia Ternes, Evy Salcedo, and Marcia C. Barbosa	
Modeling thermal inkjet and cell printing process using modified pseudopotential and thermal lattice Boltzmann methods (<i>16 pages</i>).....	033105
Salman Sohrabi and Yaling Liu	
Liquid phase stabilization versus bubble formation at a nanoscale curved interface (<i>6 pages</i>).....	033106
Jarrold Schiffbauer and Tengfei Luo	
Enhancement of the water flow velocity through carbon nanotubes resulting from the radius dependence of the friction due to electron excitations (<i>6 pages</i>).....	033107
J. B. Sokoloff	
Dynamic evolution of Rayleigh-Taylor bubbles from sinusoidal, W-shaped, and random perturbations (<i>10 pages</i>).....	033108
Zhi-Rui Zhou, You-Sheng Zhang, and Bao-Lin Tian	
Scale-similar clustering of heavy particles in the inertial range of turbulence (<i>7 pages</i>).....	033109
Taketo Arika, Kyo Yoshida, Keigo Matsuda, and Katsunori Yoshimatsu	
Torque scaling in small-gap Taylor-Couette flow with smooth or grooved wall (<i>6 pages</i>).....	033110
Bihai Zhu, Zengqi Ji, Zhengkun Lou, and Pengcheng Qian	
 Barriers to front propagation in laminar, three-dimensional fluid flows (<i>7 pages</i>).....	033111
Minh Doan, J. J. Simons, Katherine Lilienthal, Tom Solomon, and Kevin A. Mitchell	
Electrohydrodynamic coalescence of droplets using an embedded potential flow model (<i>20 pages</i>).....	033112
M. Garzon, L. J. Gray, and J. A. Sethian	
Plasma Physics	
Multifrequency Raman amplifiers (<i>6 pages</i>).....	033201
Ido Barth and Nathaniel J. Fisch	
Solvation suppression of ion recombination in gas discharge afterglow (<i>7 pages</i>).....	033202
R. Kh. Amirov, A. V. Lankin, and G. E. Norman	
Probing a dusty magnetized plasma with self-excited dust-density waves (<i>7 pages</i>).....	033203
Benjamin Tadsen, Franko Greiner, and Alexander Piel	
Fully kinetic Biermann battery and associated generation of pressure anisotropy (<i>5 pages</i>).....	033204
K. M. Schoeffler, N. F. Loureiro, and L. O. Silva	
Computational Physics	
Analysis and optimization of population annealing (<i>12 pages</i>).....	033301
Christopher Amey and Jonathan Machta	
Accelerating simulation for the multiple-point statistics algorithm using vector quantization (<i>16 pages</i>).....	033302
Chen Zuo, Zhibin Pan, and Hao Liang

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 97, NUMBER 3

MARCH 2018

Tensor network method for reversible classical computation (<i>13 pages</i>).....	033303
Zhi-Cheng Yang, Stefanos Kourtis, Claudio Chamon, Eduardo R. Mucciolo, and Andrei E. Ruckenstein	
Modeling flow and transport in fracture networks using graphs (<i>9 pages</i>).....	033304
S. Karra, D. O'Malley, J. D. Hyman, H. S. Viswanathan, and G. Srinivasan	
Applicability of Kerker preconditioning scheme to the self-consistent density functional theory calculations of inhomogeneous systems (<i>12 pages</i>).....	033305
Yuzhi Zhou, Han Wang, Yu Liu, Xingyu Gao, and Haifeng Song	
Sensitivity of electrospray molecular dynamics simulations to long-range Coulomb interaction models (<i>13 pages</i>).....	033306
Neil A. Mehta and Deborah A. Levin	
Regularized lattice Boltzmann model for immiscible two-phase flows with power-law rheology (<i>13 pages</i>).....	033307
Yan Ba, Ningning Wang, Haihu Liu, Qiang Li, and Guoqiang He	
Entropic lattice Boltzmann model for charged leaky dielectric multiphase fluids in electrified jets (<i>11 pages</i>).....	033308
Marco Lauricella, Simone Melchionna, Andrea Montessori, Dario Pisignano, Giuseppe Pontrelli, and Sauro Succi	
Phase-field-based lattice Boltzmann modeling of large-density-ratio two-phase flows (<i>14 pages</i>).....	033309
Hong Liang, Jiangrong Xu, Jiangxing Chen, Huili Wang, Zhenhua Chai, and Baochang Shi	
Tensor renormalization group with randomized singular value decomposition (<i>6 pages</i>).....	033310
Satoshi Morita, Ryo Igarashi, Hui-Hai Zhao, and Naoki Kawashima	
Realizations of highly heterogeneous collagen networks via stochastic reconstruction for micromechanical analysis of tumor cell invasion (<i>13 pages</i>).....	033311
Hanqing Nan, Long Liang, Guo Chen, Liyu Liu, Ruchuan Liu, and Yang Jiao	
Numerical simulation of three-component multiphase flows at high density and viscosity ratios using lattice Boltzmann methods (<i>15 pages</i>).....	033312
Reza Haghani Hassan Abadi, Abbas Fakhari, and Mohammad Hassan Rahimian	
Local lubrication model for spherical particles within incompressible Navier-Stokes flows (<i>16 pages</i>).....	033313
B. Lambert, L. Weynans, and M. Bergmann	
Towards information-optimal simulation of partial differential equations (<i>8 pages</i>).....	033314
Reimar H. Leike and Torsten A. Enßlin
