THIRD SERIES, VOLUME 99, NUMBER 5
PARTS A AND B

CONTENTS

MAY 2019

The Table of Contents is a total listing of Parts A and B.
Part A consists of pages 050101(R)–052311, and Part B pages 052401–059902(E).

PART A

RAPID COMMUNICATIONS

Statistical Physics

Quantum work statistics and resource theories: Bridging the gap through Rényi divergences *(6 pages)* . . . . . 050101(R)
G. Guarnieri, N. H. Y. Ng, K. Modi, J. Eisert, M. Paternostro, and J. Goold

Fidelity susceptibility in Gaussian random ensembles *(5 pages)* . . . . . 050102(R)
Piotr Sierant, Artur Maksymov, Marek Kuś, and Jakub Zakrzewski

Observation of nonscalar and logarithmic correlations in two- and three-dimensional percolation *(6 pages)* . . . . . 050103(R)
Xiaojun Tan, Romain Couvreur, Youjin Deng, and Jesper Lykke Jacobsen

Impact of eigenstate thermalization on the route to equilibrium *(5 pages)* . . . . . 050104(R)
Jonas Richter, Jochen Gemmer, and Robin Steinigeweg

Nonlinear Dynamics and Chaos

Shallow-water rogue waves: An approach based on complex solutions of the Korteweg–de Vries equation *(5 pages)* . . . . . 050201(R)
A. Ankiewicz, Mahyar Bokaeeyan, and N. Akhmediev

Networks and Complex Systems

Propagation of wind-power-induced fluctuations in power grids *(5 pages)* . . . . . 050301(R)
Hauke Haehne, Katrin Schmietendorf, Samyak Tamrakar, Joachim Peinke, and Stefan Kettemann

Spreading of computer viruses on time-varying networks *(6 pages)* . . . . . 050303(R)
Terry Brett, George Loukas, Yamir Moreno, and Nicola Perra

Fault tolerance of random graphs with respect to connectivity: Mean-field approximation for semidense random graphs *(5 pages)* . . . . . 050304(R)
Satoshi Takabe, Takafumi Nakano, and Tadashi Wadayama

Biological Physics

Sound of an axon's growth *(5 pages)* . . . . . 050401(R)
Frederic Folz, Lukas Wettmann, Giovanna Morigi, and Karsten Kruse

Copyright 2019 by American Physical Society

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 99, NUMBER 5** **MAY 2019**

Granular Materials

Universal non-mean-field scaling in the density of states of amorphous solids *(6 pages)* . . . . . 050901(R)
Harukuni Ikeda

Scaling theory of shear-induced inhomogeneous dilation in granular matter *(6 pages)* . . . . . 050902(R)
Prasenjit Das, H. George E. Hentschel, and Itamar Procaccia

Computational Physics

Application of atomic stress to compute heat flux via molecular dynamics for systems with many-body interactions *(6 pages)* . . . . . 051301(R)
Donatas Surblys, Hiroki Matsubara, Gota Kikugawa, and Taku Ohara

ARTICLES

Statistical Physics

Nonequilibrium abundances for the building blocks of life *(7 pages)* 052101
Elan Stopnitzky and Susanne Still

Occupation-time statistics of a gas of interacting diffusing particles *(14 pages)* 052102
Tal Agranov, P. L. Krapivsky, and Baruch Meerson

Effects of boundary conditions on magnetic friction *(5 pages)* 052103
Kentaro Sugimoto

Hamiltonian short-time critical dynamics of the three-dimensional XY model *(6 pages)* 052104
Lindiane C. de Souza, Adauto J. F. de Souza, and Marcelo L. Lyra

Giant disparity and a dynamical phase transition in large deviations of the time-averaged size of stochastic populations *(9 pages)* 052105
Pini Zilber, Naftali R. Smith, and Baruch Meerson

Powerful harmonic charging in a quantum battery *(6 pages)* 052106
Yu-Yu Zhang, Tian-Ran Yang, Libin Fu, and Xiaoguang Wang

Role of nonconservative scattering forces and damping on Brownian particles in optical traps *(18 pages)* 052107
Matthieu Mangeat, Yacine Amarouchene, Yann Louyer, Thomas Guérin, and David S. Dean

Local conservation laws in ultracold Fermi systems with time-dependent interaction potential *(21 pages)* 052108
P. Lipavský and Pei-Jen Lin

High-density percolation on the modified Bethe lattice *(8 pages)* 052109
C. Widder and T. Schilling

All- and one-particle distribution functions at nonequilibrium steady state under thermal gradient *(6 pages)* 052110
Hiroki Matsubara, Gota Kikugawa, and Taku Ohara

Constrained optimization as ecological dynamics with applications to random quadratic programming in high dimensions *(9 pages)* 052111
Pankaj Mehta, Wenping Cui, Ching-Hao Wang, and Robert Marsland, III

Universal broadening of zero modes: A general framework and identification *(14 pages)* 052112
M. Kieburg, A. Mielke, and K. Splittorff

(Continued)

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 99, NUMBER 5** **MAY 2019**

Logarithmic coarsening in the Coulomb glass *(7 pages)* 052113
Preeti Bhandari, Vikas Malik, and Sanjay Puri

Violation of the temperature-signifies-heat-flow rule in systems with long-range interactions *(5 pages)* 052114
Ji-Xuan Hou

Motional narrowing under Markovian and non-Markovian hopping transitions in inhomogeneous broadened absorption line shape *(12 pages)* 052115
Kazuhiko Seki and Kazuhiro Marumoto

Subdiffusive continuous-time random walks with stochastic resetting *(10 pages)* 052116
Łukasz Kuśmierz and Ewa Gudowska-Nowak

Generalized Wigner–von Neumann entropy and its typicality *(7 pages)* 052117
Zhigang Hu (胡志刚), Zhenduo Wang (王朕铎), and Biao Wu (吴飙)

Multimodal stationary states under Cauchy noise *(11 pages)* 052118
Michał Cieśla, Karol Capała, and Bartłomiej Dybiec

Random search with resetting as a strategy for optimal pollination *(11 pages)* 052119
Tal Robin, Lilach Hadany, and Michael Urbakh

α-relaxation, shear viscosity, and elastic moduli of hard-particle fluids from a mode-coupling theory with a retarded vertex *(6 pages)* 052120
S. Amokrane and Ph. Germain

Predicting continuous and discontinuous phase decompositions using steepest-entropy-ascent quantum thermodynamics *(12 pages)* 052121
Ryo Yamada, Michael R. von Spakovsky, and William T. Reynolds, Jr.

Biologically motivated asymmetric exclusion process: Interplay of congestion in RNA polymerase traffic and slippage of nascent transcript *(12 pages)* 052122
Soumendu Ghosh, Annwesha Dutta, Shubhadeep Patra, Jun Sato, Katsuhiro Nishinari, and Debashish Chowdhury

Effect of bias in a reaction-diffusion system in two dimensions *(7 pages)* 052123
Pratik Mullick and Parongama Sen

Stochastic fluctuations and quasipattern formation in reaction-diffusion systems with anomalous transport *(11 pages)* 052124
Joseph W. Baron and Tobias Galla

Fractional Langevin equation from damped bath dynamics *(5 pages)* 052125
Alex V. Plyukhin

Relativistic dissipation obeys Chapman-Enskog asymptotics: Analytical and numerical evidence as a basis for accurate kinetic simulations *(7 pages)* 052126
A. Gabbana, D. Simeoni, S. Succi, and R. Tripiccione

Exact results for first-passage-time statistics in biased quenched trap models *(9 pages)* 052127
Takuma Akimoto and Keiji Saito

Diffusion of interface and heat conduction in the three-dimensional Ising model *(7 pages)* 052128
Yusuke Masumoto and Shinji Takesue

(Continued)

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 99, NUMBER 5** **MAY 2019**

Phase diagram of a system of hard cubes on the cubic lattice *(14 pages)* 052129
N. Vigneshwar, Dipanjan Mandal, Kedar Damle, Deepak Dhar, and R. Rajesh

Discrete hydrodynamics near solid planar walls *(19 pages)* 052130
D. Duque-Zumajo, Diego Camargo, J. A. de la Torre, Farid Chejne, and Pep Español

Entropy production and heat capacity of systems under time-dependent oscillating temperature *(7 pages)* 052131
Carlos E. Fiore and Mário J. de Oliveira

Cyclic annealing as an iterated random map *(12 pages)* 052132
Muhittin Mungan and Thomas A. Witten

Exclusion in junction geometries *(7 pages)* 052133
Keming Zhang, P. L. Krapivsky, and S. Redner

Simpler free-energy functional of the Debye-Hückel model of fluids and the nonuniqueness of free-energy functionals in the theory of fluids *(9 pages)* 052134
R. Piron and T. Blenski

Sedimentation of a suspension of rods: Monte Carlo simulation of a continuous two-dimensional problem *(10 pages)* 052135
Nikolai I. Lebovka, Yuri Yu. Tarasevich, Leonid A. Bulavin, Valery I. Kovalchuk, and Nikolai V. Vygornitskii

Fractional electron transfer kinetics and a quantum breaking of ergodicity *(21 pages)* 052136
Igor Goychuk

Kinetic model of adsorption on crystal surfaces *(25 pages)* 052137
Kazuo Aoki and Vincent Giovangigli

Boltzmann stochastic thermodynamics *(8 pages)* 052138
Mário J. de Oliveira

Quantum chaotic fluctuation-dissipation theorem: Effective Brownian motion in closed quantum systems *(20 pages)* 052139
Charlie Nation and Diego Porras

Correspondence between thermodynamics and inference *(19 pages)* 052140
Colin H. LaMont and Paul A. Wiggins

Methodology to construct large realizations of perfectly hyperuniform disordered packings *(20 pages)* 052141
Jaeuk Kim and Salvatore Torquato

Nonequilibrium driven by an external torque in the presence of a magnetic field *(10 pages)* 052142
Sangyun Lee and Chulan Kwon

Timescales in the quench dynamics of many-body quantum systems: Participation ratio versus out-of-time ordered correlator *(11 pages)* 052143
Fausto Borgonovi, Felix M. Izrailev, and Lea F. Santos

Nonlinear Dynamics and Chaos

Renormalized perturbation approach to instanton-noninstanton transition in nearly integrable tunneling processes *(18 pages)* 052201
Yasutaka Hanada, Akira Shudo, Teruaki Okushima, and Kensuke S. Ikeda

(Continued)

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 99, NUMBER 5** **MAY 2019**

Theoretical study of buckling-based nonlinear transition near a static bifurcation point *(5 pages)* 052202
Manhee Lee, Sangmin An, and Wonho Jhe

First-passage-time distribution in a moving parabolic potential with spatial roughness *(11 pages)* 052203
Yongge Li, Yong Xu, and Jürgen Kurths

Why pacing frequency affects the production of early afterdepolarizations in cardiomyocytes: An explanation revealed by slow-fast analysis of a minimal model *(12 pages)* 052205
Theodore Vo and Richard Bertram

Attraction centers and parity-time-symmetric delta-functional dipoles in critical and supercritical self-focusing media *(10 pages)* 052206
Li Wang, Boris A. Malomed, and Zhenya Yan

Perturbation analysis and comparison of network synchronization methods *(14 pages)* 052207
Zhiwei He, Chenggui Yao, Jun Yu, and Meng Zhan

Intermittent stickiness synchronization *(8 pages)* 052208
Rafael M. da Silva, Cesar Manchein, and Marcus W. Beims

Frequency-doubling effect in acoustic reflection by a nonlinear, architected rotating-square metasurface *(10 pages)* 052209
Xinxin Guo, Vitalyi E. Gusev, Vincent Tournat, Bolei Deng, and Katia Bertoldi

Taming intrinsic localized modes in a DNA lattice with damping, external force, and inhomogeneity *(12 pages)* 052210
Carlos Lawrence Gninzanlong, Frank Thomas Ndjomatchoua, and Clément Tchawoua

Finite-barrier corrections for multidimensional barriers in colored noise *(14 pages)* 052211
Thomas Bartsch, F. Revuelta, R. M. Benito, and F. Borondo

Operator dynamics in a Brownian quantum circuit *(7 pages)* 052212
Tianci Zhou and Xiao Chen

Chaotic transport of electron wave packet in Weyl semimetal slab *(10 pages)* 052213
Abdullah Yar and Safi Ullah Khan

Logic gates on stationary dissipative solitons *(12 pages)* 052214
Bogdan A. Kochetov, Iaroslavna Vasylieva, Alexander Butrym, and Vladimir R. Tuz

Concurrent formation of nearly synchronous clusters in each intertwined cluster set with parameter mismatches *(6 pages)* 052215
Young Sul Cho

Lateral inhibition provides a unifying framework for spatiotemporal pattern formation in media comprising relaxation oscillators *(9 pages)* 052216
R. Janaki, Shakti N. Menon, Rajeev Singh, and Sitabhra Sinha

Doubly periodic solutions of the class-I infinitely extended nonlinear Schrödinger equation *(7 pages)* 052217
M. Crabb and N. Akhmediev

Synchronization of oscillators via active media *(10 pages)* 052218
Derek Orr and Bard Ermentrout

(Continued)

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 99, NUMBER 5** **MAY 2019**

Unstable wave-packet perturbations in an advective Cahn-Hilliard process *(7 pages)* 052219
Antonio Barletta and Michele Celli

Turbulent transport in reaction-diffusion systems *(6 pages)* 052220
A. S. Il'yn, V. A. Sirota, and K. P. Zybin

Vibrational antiresonance in nonlinear coupled systems *(7 pages)* 052221
Prasun Sarkar and Deb Shankar Ray

Attenuation behavior of thermoacoustic combustion instability analyzed by a complex-network- and synchronization-based approach *(8 pages)* 052222
Shogo Murayama and Hiroshi Gotoda

Subdiffusive Lévy flights in quantum nonlinear Schrödinger lattices with algebraic power nonlinearity *(16 pages)* 052223
Alexander V. Milovanov and Alexander Iomin

Networks and Complex Systems

Fading of remote synchronization in tree networks of Stuart-Landau oscillators *(11 pages)* 052301
Baris Karakaya, Ludovico Minati, Lucia Valentina Gambuzza, and Mattia Frasca

Impact of perception models on friendship paradox and opinion formation *(8 pages)* 052302
Eun Lee, Sungmin Lee, Young-Ho Eom, Petter Holme, and Hang-Hyun Jo

Optimal geometry of transportation networks *(10 pages)* 052303
David Aldous and Marc Barthelemy

Sampling networks by nodal attributes *(10 pages)* 052304
Yohsuke Murase, Hang-Hyun Jo, János Török, János Kertész, and Kimmo Kaski

Energy cost for controlling complex networks with linear dynamics *(12 pages)* 052305
Gaopeng Duan, Aming Li, Tao Meng, Guofeng Zhang, and Long Wang

Emergence of frustration signals systemic risk *(6 pages)* 052306
Chandrashekar Kuyyamudi, Anindya S. Chakrabarti, and Sitabhra Sinha

Voter model on networks and the multivariate beta distribution *(10 pages)* 052307
Shintaro Mori, Masato Hisakado, and Kazuaki Nakayama

Order parameter allows classification of planar graphs based on balanced fixed points in the Kuramoto model *(14 pages)* 052308
Franz Kaiser and Karen Alim

Graph comparison via the nonbacktracking spectrum *(7 pages)* 052309
Andrew Mellor and Angelica Grusovin

Expanding spatial domains and transient scaling regimes in populations with local cyclic competition *(8 pages)* 052310
P. P. Avelino, J. Menezes, B. F. de Oliveira, and T. A. Pereira

Individual perception dynamics in drunk games *(12 pages)* 052311
Alberto Antonioni, Luis A. Martinez-Vaquero, Cole Mathis, Leto Peel, and Massimo Stella

(Continued)

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E THIRD SERIES, VOLUME 99, NUMBER 5 MAY 2019

PART B

Biological Physics

Search-and-capture model of cytoneme-mediated morphogen gradient formation *(18 pages)* 052401
Paul C. Bressloff and Hyunjoong Kim

Statistical mechanics of spike events underlying phase space partitioning and sequence codes in large-scale models of neural circuits *(16 pages)* 052402
Maximilian Puelma Touzel and Fred Wolf

Dynamics of tinnitus and coordinated reset therapy *(6 pages)* 052403
Zachary Jackson and Kurt Wiesenfeld

Computational approach to determine the relative biological effectiveness of fast neutrons using the Geant4-DNA toolkit and a DNA atomic model from the Protein Data Bank *(8 pages)* 052404
Azam Zabihi, Sebastien Incerti, Ziad Francis, Ghasem Forozani, Farid Semsarha, Amir Moslehi, Peiman Rezaeian, and Mario A. Bernal

Trends in embryonic and ontogenetic growth metabolisms in nonavian dinosaurs and extant birds, mammals, and crocodylians with implications for dinosaur egg incubation *(14 pages)* 052405
Scott A. Lee

Scaling behavior of nonequilibrium measures in internally driven elastic assemblies *(12 pages)* 052406
Grzegorz Gradziuk, Federica Mura, and Chase P. Broedersz

Effects of inhibitory and excitatory neurons on the dynamics and control of avalanching neural networks *(13 pages)* 052407
Jacob Carroll, Ada Warren, and Uwe C. Täuber

Invasion-controlled pattern formation in a generalized multispecies predator-prey system *(7 pages)* 052408
D. Bazeia, B. F. de Oliveira, and A. Szolnoki

Driven transport on a flexible polymer with particle recycling: A model inspired by transcription and translation *(10 pages)* 052409
Lucas D. Fernandes and Luca Ciandrini

Null model exhibiting synchronized dynamics in uncoupled oscillators *(16 pages)* 052410
Tuhin Chakrabortty, Akash Suman, Anjali Gupta, Varsha Singh, and Manoj Varma

Transport cycle of *Escherichia coli* lactose permease in a nonhomogeneous random walk model *(5 pages)* 052411
Yan B. Barreto, Matheus L. Rodrigues, and Adriano M. Alencar

Neural activity of heterogeneous inhibitory spiking networks with delay *(13 pages)* 052412
Stefano Luccioli, David Angulo-Garcia, and Alessandro Torcini

Compression stiffening in biological tissues: On the possibility of classic elasticity origins *(7 pages)* 052413
T. A. Engstrom, K. Pogoda, K. Cruz, P. A. Janmey, and J. M. Schwarz

Correlated states in balanced neuronal networks *(21 pages)* 052414
Cody Baker, Christopher Ebsch, Ilan Lampl, and Robert Rosenbaum

Quantitative assessment of the spatial crowding heterogeneity in cellular fluids *(6 pages)* 052415
Claudia Donth and Matthias Weiss

(Continued)

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 99, NUMBER 5** **MAY 2019**

Characteristics of phospholipid vesicles enhanced by adhesion on an annular region *(11 pages)* 052416
Janja Majhenc and Bojan Božič

Extending the linear-noise approximation to biochemical systems influenced by intrinsic noise and slow lognormally distributed extrinsic noise *(20 pages)* 052417
Emma M. Keizer, Björn Bastian, Robert W. Smith, Ramon Grima, and Christian Fleck

Searching for collective behavior in a small brain *(13 pages)* 052418
Xiaowen Chen, Francesco Randi, Andrew M. Leifer, and William Bialek

Polymers

Solvent self-diffusion dependence on the swelling degree of a hydrogel *(9 pages)* 052501
Wilson Barros, Jr.

Improved approximations of non-Gaussian probability, force, and energy of a single polymer chain *(12 pages)* . . . 052502
Vahid Morovati and Roozbeh Dargazany

Plectoneme dynamics and statistics in braided polymers *(9 pages)* 052503
Giada Forte, Michele Caraglio, Davide Marenduzzo, and Enzo Orlandini

Model-free description of polymer-coated gold nanoparticle dynamics in aqueous solutions obtained by Bayesian analysis of neutron spin echo data *(18 pages)* 052504
Alessio De Francesco, Luisa Scaccia, R. Bruce Lennox, Eleonora Guarini, Ubaldo Bafile, Peter Falus, and Marco Maccarini

Effects of spherical confinement and backbone stiffness on flexible polymer jamming *(9 pages)* 052505
Samuel M. Soik and Tristan A. Sharp

Colloids, Complex Fluids, and Active Matter

Boundary-induced inhomogeneity of particle layers in the solidification of suspensions *(14 pages)* 052601
Brice Saint-Michel, Marc Georgelin, Sylvain Deville, and Alain Pocheau

Self-propelled Vicsek particles at low speed and low density *(8 pages)* 052602
M. Leticia Rubio Puzzo, Andrés De Virgiliis, and Tomás S. Grigera

Topological generalization of the rigid-nonrigid transition in soft-sphere and hard-sphere fluids *(8 pages)* 052603
Tae Jun Yoon, Min Young Ha, Won Bo Lee, Youn-Woo Lee, and Emanuel A. Lazar

Additivity and density fluctuations in Vicsek-like models of self-propelled particles *(11 pages)* 052604
Subhadip Chakraborti and Punyabrata Pradhan

Characterization and control of a bottleneck-induced traffic-jam transition for self-propelled particles in a track *(9 pages)* 052605
Thomas Barois, Jean-François Boudet, Nicolas Lanchon, Juho S. Lintuvuori, and Hamid Kellay

Radial distribution function of Lennard-Jones fluids in shear flows from intermediate asymptotics *(12 pages)* 052606
Luca Banetta and Alessio Zaccone

Geometric control of bacterial surface accumulation *(10 pages)* 052607
Rachel Mok, Jörn Dunkel, and Vasily Kantsler

(Continued)

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 99, NUMBER 5** **MAY 2019**

Liquid Crystals

Stability of binary colloidal crystals immersed in a cholesteric liquid crystal *(9 pages)* 052701
Setarehalsadat Changizrezaei and Colin Denniston

Photoswitchable chevron topographies of glassy nematic coatings *(7 pages)* 052702
W. X. Qian, Y. Ni, and L. H. He

Nanoparticle-controlled glassy dynamics in nematogen-based nanocolloids *(11 pages)* 052703
Aleksandra Drozd-Rzoska, Szymon Starzonek, Sylwester J. Rzoska, and Samo Kralj

Granular Materials

Mean force and fluctuations on a wall immersed in a sheared granular flow *(13 pages)* 052901
François Kneib, Thierry Faug, Frédéric Dufour, and Mohamed Naaim

Seismicity in sheared granular matter *(6 pages)* 052902
Aghil Abed Zadeh, Jonathan Barés, Joshua E. S. Socolar, and Robert P. Behringer

Solid Mechanics

Nonlinear elasticity of incompatible surface growth *(13 pages)* 053001
Lev Truskinovsky and Giuseppe Zurlo

Displacement field around a rigid sphere in a compressible elastic environment, corresponding higher-order Faxén relations, as well as higher-order displaceability and rotateability matrices *(18 pages)* 053002
Mate Puljiz and Andreas M. Menzel

Spatial strain correlations, machine learning, and deformation history in crystal plasticity *(15 pages)* 053003
Stefanos Papanikolaou, Michail Tzimas, Andrew C. E. Reid, and Stephen A. Langer

Statistical mechanics of asymmetric tethered membranes: Spiral and crumpled phases *(23 pages)* 053004
Tirthankar Banerjee, Niladri Sarkar, John Toner, and Abhik Basu

Shear-induced contact area anisotropy explained by a fracture mechanics model *(9 pages)* 053005
A. Papangelo, J. Scheibert, R. Sahli, G. Pallares, and M. Ciavarella

Fluid Dynamics

Clusterlike instabilities in bubble-plume-driven flows *(15 pages)* 053101
Sai Ankit Etha, Anupam Jena, and Rajaram Lakkaraju

Effects of the Atwood number on the Richtmyer-Meshkov instability in elastic-plastic media *(10 pages)* 053102
Qian Chen, Li Li, Yousheng Zhang, and Baolin Tian

Regime transition in the energy cascade of rotating turbulence *(8 pages)* 053103
T. Pestana and S. Hickel

Rayleigh-Taylor-instability experiments with elastic-plastic materials *(14 pages)* 053104
Rinosh Polavarapu, Pamela Roach, and Arindam Banerjee

Orthogonal wavelet multiresolution analysis of the turbulent boundary layer measured with two-dimensional time-resolved particle image velocimetry *(10 pages)* 053105
Guosheng He, Jinjun Wang, and Akira Rinoshika

(Continued)

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 99, NUMBER 5** **MAY 2019**

Nonlinear dynamics of two coupled bubbles oscillating inside a liquid-filled cavity surrounded by an elastic medium *(16 pages)* 053106
Alexander A. Doinikov, Diane Bienaimé, S. Roberto Gonzalez-Avila, Claus-Dieter Ohl, and Philippe Marmottant

Propulsion by stiff elastic filaments in viscous fluids *(28 pages)* 053107
Panayiota Katsamba and Eric Lauga

Normal and oblique droplet impingement dynamics on moving dry walls *(16 pages)* 053108
K. Ashoke Raman

Effect of finite amplitude of bottom corrugations on Fabry-Perot resonance of water waves *(10 pages)* 053109
Jie Zhang and Michel Benoit

Faraday waves over a permeable rough substrate *(6 pages)* 053110
Diego Barba Maggi, Alejandro Boschan, Roman Martino, Marcelo Piva, and Jean-Christophe Géminard

Numerical simulation of flow over a parallel cantilevered flag in the vicinity of a rigid wall *(13 pages)* 053111
Li Wang and Fang-bao Tian

Discontinuity in the sedimentation system with two particles having different densities in a vertical channel *(14 pages)* 053112
Deming Nie and Jianzhong Lin

Artificial neural network approach to large-eddy simulation of compressible isotropic turbulence *(21 pages)* 053113
Chenyue Xie, Jianchun Wang, Ke Li, and Chao Ma

Local estimates of Hölder exponents in turbulent vector fields *(12 pages)* 053114
F. Nguyen, J.-P. Laval, P. Kestener, A. Cheskidov, R. Shvydkoy, and B. Dubrulle

Asymmetric time-cross-correlation of nonequilibrium concentration fluctuations in a ternary liquid mixture *(10 pages)* 053115
Doriano Brogioli, Fabrizio Croccolo, and Alberto Vailati

Rapidly rotating Rayleigh-Bénard convection with a tilted axis *(10 pages)* 053116
L. Novi, J. von Hardenberg, D. W. Hughes, A. Provenzale, and E. A. Spiegel

Plasma Physics

Pressure in warm and hot dense matter using the average-atom model *(10 pages)* 053201
Gérald Faussurier and Christophe Blancard

Local approach to the study of energy transfers in incompressible magnetohydrodynamic turbulence *(20 pages)* 053202
Denis Kuzzay, Olga Alexandrova, and Lorenzo Matteini

Dynamical structure factor of strongly coupled ions in a dense quantum plasma *(9 pages)* 053203
Zh. A. Moldabekov, H. Kählert, T. Dornheim, S. Groth, M. Bonitz, and T. S. Ramazanov

Diamagnetic field states in cosmological plasmas *(7 pages)* 053204
Felipe A. Asenjo and Swadesh M. Mahajan

Thomson scattering from dense inhomogeneous plasmas *(9 pages)* 053205
T.-N. Beuermann, R. Redmer, and Th. Bornath

(Continued)

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 99, NUMBER 5** **MAY 2019**

Ion friction at small values of the Coulomb logarithm *(8 pages)* 053206
Tucker Sprenkle, Adam Dodson, Quinton McKnight, Ross Spencer, Scott Bergeson, Abdourahmane Diaw, and Michael S. Murillo

Interpretation of proton radiography experiments of hohlraums with three-dimensional simulations *(5 pages)* 053207
P.-E. Masson-Laborde, S. Laffite, C. K. Li, S. C. Wilks, R. Riquier, R. D. Petrasso, G. Kluth, and V. Tassin

Time intermittency in nondiffusive transport regimes of suprathermal ions in turbulent plasmas *(6 pages)* 053208
F. Manke, M. Baquero-Ruiz, I. Furno, O. Chellaï, A. Fasoli, and P. Ricci

Transverse instability magnetic field thresholds of electron phase-space holes *(8 pages)* 053209
I. H. Hutchinson

Theory of a cavity around a large floating sphere in complex (dusty) plasma *(8 pages)* 053210
Sergey Khrapak, Peter Huber, Hubertus Thomas, Vadim Naumkin, Vladimir Molotkov, and Andrey Lipaev

Computational Physics

Generalized lattice Boltzmann model for frosting *(14 pages)* 053301
Timan Lei, Kai H. Luo, and Duan Wu

Separate-phase model and its lattice Boltzmann algorithm for liquid-vapor two-phase flows in porous media *(18 pages)* 053302
Shurong Lei and Yong Shi

Hybrid Monte Carlo algorithm for sampling rare events in space-time histories of stochastic fields *(21 pages)* 053303
G. Margazoglou, L. Biferale, R. Grauer, K. Jansen, D. Mesterházy, T. Rosenow, and R. Tripiccione

Diffuse-interface immersed-boundary framework for conjugate-heat-transfer problems *(14 pages)* 053304
Mukesh Kumar and Ganesh Natarajan

Hydrodynamic behavior of the pseudopotential lattice Boltzmann method for interfacial flows *(9 pages)* 053305
Daniele Chiappini, Mauro Sbragaglia, Xiao Xue, and Giacomo Falcucci

Tricoupled hybrid lattice Boltzmann model for nonisothermal drying of colloidal suspensions in micropore structures *(11 pages)* 053306
Feifei Qin, Ali Mazloomi Moqaddam, Luca Del Carro, Qinjun Kang, Thomas Brunschwiler, Dominique Derome, and Jan Carmeliet

Control-oriented model of dielectrophoresis and electrorotation for arbitrarily shaped objects *(10 pages)* 053307
Tomáš Michálek, Aude Bolopion, Zdeněk Hurák, and Michaël Gauthier

Relative entropy indicates an ideal concentration for structure-based coarse graining of binary mixtures *(14 pages)* 053308
David Rosenberger and Nico F. A. van der Vegt

Structure-preserving strategy for conservative simulation of the relativistic nonlinear Landau-Fokker-Planck equation *(7 pages)* 053309
Takashi Shiroto and Yasuhiko Sentoku

Correlation-driven direct sampling method for geostatistical simulation and training image evaluation *(20 pages)* 053310
Chen Zuo, Zhibin Pan, Zhaoqi Gao, and Jinghuai Gao

Randomization algorithms for large sparse networks *(15 pages)* 053311
Kai Puolamäki, Andreas Henelius, and Antti Ukkonen

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 99, NUMBER 5** **MAY 2019**

COMMENTS

Comment on "Thermal transport in dimerized harmonic lattices: Exact solution, crossover behavior, and extended reservoirs" *(2 pages)* 056101
Milica Anđelić and Carlos M. da Fonseca

ERRATA

Erratum: Transport coefficients for driven granular mixtures at low density [Phys. Rev. E **88**, 052201 (2013)] and Heat flux of driven granular mixtures at low density: Stability analysis of the homogeneous steady state [Phys. Rev. E **97**, 022902 (2018)] *(1 page)* . . . . . 059901(E)
Nagi Khalil and Vicente Garzó

Erratum: Size effects in long-term quasistatic heat transport [Phys. Rev. E **87**, 062118 (2013)] *(2 pages)* . . . . . 059902(E)
George Y. Panasyuk and Kirk L. Yerkes
