We have just become aware of the following typographical errors:
1. The second equation of Eq. (1) should read as
\[ \frac{\partial R_{\alpha\beta}}{\partial t} + (v \cdot \nabla) R_{\alpha\beta} = \frac{\partial v_\alpha}{\partial x_\gamma} R_{\gamma\beta} + R_{\alpha\gamma} \frac{\partial v_\beta}{\partial x_\gamma} - T_{\alpha\beta}. \]

The corresponding definition of \( T_{\alpha\beta} \), 10 lines below Eq. (1), should read as
\[ T_{\alpha\beta} = \left[ \nu_p P(x,t) R_{\alpha\beta} - \delta_{\alpha\beta} \right] / \tau_p. \]

2. The second equation of Eq. (2) should read as
\[ \frac{db_n}{dt} = \Phi_{n,vb} + \Phi_{n,bv} - \frac{1}{\tau_p} P(b) b_n. \]

3. On the second page, the definitions of \( \Phi_{n,vv}, \Phi_{n,bb}, \Phi_{n,bv}, \) and \( \Phi_{n,vb} \) are missing a complex conjugate symbol “∗” over the brackets “(...)”.

The corrections above do not affect the results presented in the paper because our computer program used the correct equations.

We thank Sagar Chakraborty for discussions.
