|                                                                                                                                                                 |        |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Breakdown of Universal Transport in Correlated <i>d</i> -Wave Superconductors .....                                                                             | 257003 |
| Brian M. Andersen and P.J. Hirschfeld                                                                                                                           |        |
| Anisotropic Multiband Many-Body Interactions in $\text{LuNi}_2\text{B}_2\text{C}$ .....                                                                         | 257004 |
| B. Bergk, V. Petzold, H. Rosner, S.-L. Drechsler, M. Bartkowiak, O. Ignatchik, A.D. Bianchi, I. Sheikin, P.C. Canfield, and J. Wosnitzer                        |        |
| Current-Driven Vortex Oscillations in Metallic Nanocontacts .....                                                                                               | 257201 |
| Q. Mistral, M. van Kampen, G. Hrkac, Joo-Von Kim, T. Devolder, P. Crozat, C. Chappert, L. Lagae, and T. Schrefl                                                 |        |
| Stability of Bose-Einstein Condensates of Hot Magnons in Yttrium Iron Garnet Films .....                                                                        | 257202 |
| I.S. Tupitsyn, P.C. Stamp, and A.L. Burin                                                                                                                       |        |
| Metal-Insulator Transition and Its Relation to Magnetic Structure in $(\text{LaMnO}_3)_{2n}/(\text{SrMnO}_3)_n$ Superlattices .....                             | 257203 |
| A. Bhattacharya, S.J. May, S.G. te Velthuis, M. Warusawithana, X. Zhai, Bin Jiang, J.-M. Zuo, M.R. Fitzsimmons, S.D. Bader, and J.N. Eckstein                   |        |
| Bonding, Backbonding, and Spin-Polarized Molecular Orbitals: Basis for Magnetism and Semiconducting Transport in $\text{V}[\text{TCNE}]_{x \sim 2}$ .....       | 257204 |
| J.B. Kortright, D.M. Lincoln, R. Shima Edelstein, and A.J. Epstein                                                                                              |        |
| Nearly Perfect Triplet-Triplet Energy Transfer from Wannier Excitons to Naphthalene in Organic-Inorganic Hybrid Quantum-Well Materials .....                    | 257401 |
| K. Ema, M. Inomata, Y. Kato, H. Kunugita, and M. Era                                                                                                            |        |
| Magnetic Color Symmetry of Lattice Rotations in a Diamagnetic Material .....                                                                                    | 257601 |
| S. Denev, A. Kumar, M.D. Biegalski, H.W. Jang, C.M. Folkman, A. Vasudevarao, Y. Han, I.M. Reaney, S. Trolhier-McKinstry, C.-B. Eom, D.G. Schlom, and V. Gopalan |        |
| Dynamics and Reactivity of Positively Charged Muonium in Heavily Doped Si:B and Comparisons with Hydrogen .....                                                 | 257602 |
| A.I. Mansour, Z. Salman, K.H. Chow, I. Fan, P.J. King, B. Hitti, J. Jung, and S.P. Cottrell                                                                     |        |
| Temperature Response of $^{129}\text{Xe}$ Depolarization Transfer and Its Application for Ultrasensitive NMR Detection .....                                    | 257603 |
| Leif Schröder, Tyler Meldrum, Monica Smith, Thomas J. Lowery, David E. Wemmer, and Alexander Pines                                                              |        |

### Soft Matter, Biological, and Interdisciplinary Physics

|                                                                             |        |
|-----------------------------------------------------------------------------|--------|
| ☞ Cooperativity, Sensitivity, and Noise in Biochemical Signaling .....      | 258101 |
| William Bialek and Sima Setayeshgar                                         |        |
| ☞ Limits of Filopodium Stability .....                                      | 258102 |
| Sander Pronk, Phillip L. Geissler, and Daniel A. Fletcher                   |        |
| Mutagenic Evidence for the Optimal Control of Evolutionary Dynamics .....   | 258103 |
| Raj Chakrabarti, Herschel Rabitz, Stacey L. Springs, and George L. McLendon |        |
| Microcanonical versus Canonical Analysis of Protein Folding .....           | 258104 |
| J. Hernández-Rojas and J.M. Gomez Llorente                                  |        |
| Ion Specific Protein Assembly and Hydrophobic Surface Forces .....          | 258105 |
| Mikael Lund, Pavel Jungwirth, and Clifford E. Woodward                      |        |
| Viscous-Fingering-Like Instability of Cell Fragments .....                  | 258106 |
| A.C. Callan-Jones, J.-F. Joanny, and J. Prost                               |        |
| Bayesian Approach to Network Modularity .....                               | 258701 |
| Jake M. Hofman and Chris H. Wiggins                                         |        |

### Errata

|                                                                                                                             |        |
|-----------------------------------------------------------------------------------------------------------------------------|--------|
| Erratum: Disorder Induced Transition into a One-Dimensional Wigner Glass [Phys. Rev. Lett. <b>99</b> , 236403 (2007)] ..... | 259901 |
| Shimul Akhanjee and Joseph Rudnick                                                                                          |        |
| Erratum: 3D Short-Range Wetting and Nonlocality [Phys. Rev. Lett. <b>100</b> , 136105 (2008)] .....                         | 259902 |
| A.O. Parry, C. Rascón, N.R. Bernardino, and J.M. Romero-Enrique                                                             |        |

☞ By suggesting a few manuscripts each week, we hope to promote reading across fields. Please see our Announcement Phys. Rev. Lett. 98, 010001 (2007).

**Physical Review**  
**Focus**

Brief explanations of selected papers from this and other APS journals appear regularly at the *Phys. Rev. Focus* web site (<http://focus.aps.org>). Readers can also sign up for weekly e-mail summaries of *Focus* stories.
