

Two scanning tunneling microscopy images of the same four single, and one cluster of, gold adatoms on a gold surface (solid background) partially covered with C_{60} (patterned background). The image on the right, taken with a C_{60} tip, reveals submolecular structure at the adatoms. See article 206803. See also Focus story (<http://focus.aps.org/story/v24/st17>).
