

Mosaic based on a picture of John Stewart Bell taken by Renate Bertlmann, and composed of pictures of some quantum physicists, papers, and experiments. A pair of Letters reports statistically significant loophole-free Bell tests which rule out local realism. Selected for Editors' Suggestions and a Viewpoint in *Physics*. [M. Giustina *et al*., Phys. Rev. Lett. **115**, 250401 (2015) and L. K. Shalm *et al*., Phys. Rev. Lett. **115**, 250402 (2015)]
