

3D volume rendering of a direct numerical simulation of double diffusive fingering convection flow (salt fingers) between two parallel plates, under the no-slip boundary condition (top) and free-slip boundary condition (bottom). The two plots share the same color map and opacity, which are both set by salinity. [Yantao Yang, Roberto Verzicco, and Detlef Lohse, Phys. Rev. Lett. **117**, 184501 (2016)]
