

Optical pulling and pushing are demonstrated by supercontinuum light incident on a hexagonal gold plate (top, left) of area about 80 μm^2 held on a tapered fiber in air. The time sequence of the photos runs from left to right across the top, then from left to right across the bottom. Selected for Focus in *Physics* and for an Editors' Suggestion. [Jinsheng Lu *et al.*, Phys. Rev. Lett. **118**, 043601 (2017)]
