

Current Rapid Communications

Rapid Communications in Physical Review are short reports of important new work which are of sufficient interest to be given priority handling in the publication process. The following papers have been accepted for publication as Rapid Communications and appear as indicated in the designated Physical Review issues.

Physical Review A, Vol. 51, April 1995, Issue 4

Intrinsic and operational observables in quantum mechanics	Berthold-Georg Englert and Krzysztof Wódkiewicz	2661
Relativistic configuration-interaction analysis of parity nonconservation in Ba^+	Swati Malhotra, Angom D. Singh, and B. P. Das	2665
Determination of highly excited states of diatomic-molecular ions using exact H_2^+ -like orbitals	C. Le Sech	2668
Asymmetry parameter and total cross section for the photodetachment of the metastable $\text{Be}^- 1s^2 2s 2p^2 \ ^4P$ state	Christos Sinanis, Yannis Komninos, and Cleanthes A. Nicolaides	2672
Absolute triply differential cross sections for double photoionization of helium at 10, 20, and 52.9 eV above threshold	Marcel Pont and Robin Shakeshaft	2676
s -wave elastic collisions between cold ground-state ^{87}Rb atoms	N. R. Newbury, C. J. Myatt, and C. E. Wieman	2680
Breakdown of asymptotics of the double photoionization of helium at the high-energy limit	E. G. Drukarev	2684
Ionization of oriented Rydberg states by subpicosecond half-cycle electromagnetic pulses	R. R. Jones, N. E. Tielking, D. You, C. Raman, and P. H. Bucksbaum	2687
Dynamics of optical-field-ionized plasmas for x-ray lasers	T. D. Donnelly, R. W. Lee, and R. W. Falcone	2691
Dissociative tunnel ionization of H_2 in an intense mid-ir laser field	F. A. Ilkov, T. D. G. Walsh, S. Turgeon, and S. L. Chin	2695
Efficient quenching of population trapping in excited Yb^+	D. J. Seidel and L. Maleki	2699
Electromagnetically induced transparency in a three level Λ -type system in rubidium atoms	Yong-qing Li and Min Xiao	2703
Theory of self-phase-matching	Surya P. Tewari, H. Huang, and R. W. Boyd	2707
Electromagnetic-field-induced transparency in high-density exciton systems	G. S. Agarwal	2711

Physical Review B, Vol. 51, 1 April 1995, Issue 14

Pressure-temperature phase diagram of solid hydrogen sulfide determined by Raman spectroscopy	H. Shimizu, H. Yamaguchi, S. Sasaki, A. Honda, S. Endo, and M. Kobayashi	9391
Spin-orientation dependence in neutron reflection from a single magnetic film	S. J. Blundell, M. Gester, J. A. C. Bland, H. J. Lauter, V. V. Pasyuk, and A. V. Petrenko	9395
Remarkable difference in the effects of nonmagnetic impurities on the Haldane and spin-Peierls systems	Yoshitami Ajiro, Takayuki Asano, Fuminori Masui, Mamoru Mekata, Hiroko Aruga-Katori, Tsuneaki Goto, and Hikomitu Kikuchi	9399
Spin dynamics of La_2CuO_4 and the two-dimensional Heisenberg model	Anders W. Sandvik and Douglas J. Scalapino	9403
Photon-activated switch behavior in the single-electron transistor with a superconducting island	J. M. Hergenrother, J. G. Lu, M. T. Tuominen, D. C. Ralph, and M. Tinkham	9407
Equivalent phenomena for commensurate vortex states and zero field in a modulated sine-Gordon system	M. A. Itzler and M. Tinkham	9411
Role of vortices in the mutual coupling of superconducting and normal-metal films	Efrat Shimshoni	9415
Vortex liquid in single-crystal $\text{YBa}_2(\text{Cu}_{1-x}\text{Fe}_x)_3\text{O}_{7-\delta}$ of varying anisotropy	Yu. Eltsev and Ö. Rapp	9419
Vortex lattice of layered superconductors in parallel magnetic fields	M. Ichioka	9423

Physical Review D, Vol. 51, 1 April 1995, Issue 7

Simple radiative neutrino mass matrix for solar and atmospheric oscillations	Ernest Ma	3145
--	-----------	------
