Current Rapid Communications

Rapid Communications in Physical Review are short reports of important new work which are of sufficient interest to be given priority handling in the publication process. The following papers have been accepted for publication as Rapid Communications and appear as indicated in the designated Physical Review issues.

Physical Review D, Vol. 51, 15 January 1995, Issue 2

Scattering of weakly interacting massive particles from ^{73}Ge ..... V. Dimitrov, J. Engel, and S. Pittel 291
Heavy τ neutrino as the late decaying particle in the cold dark matter scenario ..... Hisashi Kikuchi and Ernest Ma 296
Electroweak strings produce baryons ..... Manuel Barriola 300
Evidence for the stability of extremal black p-branes ..... Ruth Gregory and Raymond Laflamme 305
Class of Einstein-Maxwell dilatons ..... Tonatiuh Matos, Darío Núñez, and Hernando Quevado 310
New look at the critical behavior near the threshold of black hole formation in the Russo-Susskind-Thorlacius model
..... Jian-Ge Zhou, H. J. W. Müller-Kirsten, and Mao-Zhi Yang 314
