Current Rapid Communications

Rapid Communications in Physical Review are short reports of important new work which are of sufficient interest to be given priority handling in the publication process. The following papers have been accepted for publication as Rapid Communications and appear as indicated in the designated Physical Review issues.

Physical Review B, Vol. 51, 15 June 1995, Issue 24

Evidence for quantum states corresponding to families of stable and chaotic classical orbits in a wide potential well ..... T. M. Fromhold, A. Fogarty, L. Eaves, F. W. Sheard, M. Henini, T. J. Foster, P. C. Main, and G. Hill 18029

Disorder-tuned transition between a quantum Hall liquid and Hall insulator ..... L. W. Wong, H. W. Jiang, N. Trivedi and E. Palm 18033

Phase breaking in ballistic quantum dots: Transition from two- to zero-dimensional behavior ..... J. P. Bird, K. Ishibashi, D. K. Ferry, Y. Ochiai, Y. Aoyagi, and T. Sugano 18037

Resonant-energy relaxation of terahertz-driven two-dimensional electron gases ..... N. G. Asmar, A. G. Markelz, E. G. Gwinn, J. Černe, M. S. Sherwin, K. L. Campman, P. F. Hopkins, and A. C. Gossard 18041

Influence of metastable states of two-dimensional electrons on the electronic properties of composite fermions ..... I. V. Kukushkin, R. J. Haug, K. von Klitzing, and K. Eberl 18045

Quenching of excitonic optical transitions by excess electrons in GaAs quantum wells ..... A. J. Shields, M. Pepper, D. A. Ritchie, M. Y. Simmons, and G. A. C. Jones 18049

Low-temperature anti-Stokes luminescence mediated by disorder in semiconductor quantum-well structures ..... R. Hellmann, A. Euteneuer, S. G. Hense, J. Feldmann, P. Thomas, E. O. Göbel, D. R. Yakovlev, A. Waag, and G. Landwehr 18053

Physical Review D, Vol. 52, 1 July 1995, Issue 1

Predictions of the top quark mass in the minimal supersymmetric left-right model ..... Biswajoy Brahmachari 1
