Current Rapid Communications

Rapid Communications in Physical Review are short reports of important new work which are of sufficient interest to be given priority handling in the publication process. The following papers have been accepted for publication as Rapid Communications and appear as indicated in the designated Physical Review issues.

Physical Review A, Vol. 53, March 1996, Issue 3

Dirac's contour representation in thermofield dynamics ..... A. Vourdas and R. F. Bishop R1205
Interferometric Bell-state analysis ..... Markus Michler, Klaus Mattle, Harald Weinfurter, and Anton Zeilinger R1209
Cross section for Compton scattering by polarized bound electrons ..... F. Bell, J. Felsteiner, and L. P. Pitaevskii R1213
Photoassociative spectroscopy of ultracold ^{39}K atoms in a high-density vapor-cell magneto-optical trap ..... H. Wang, P. L. Gould, and W. C. Stwalley R1216
Role of off-resonant excitation in cold collisions in a strong laser field ..... K.-A. Suominen, K. Burnett, and P. S. Julienne R1220
Laser cooling of Rydberg atoms in bichromatic standing waves ..... J. Guo and E. Arimondo R1224

Physical Review D, Vol. 53, 1 March 1996, Issue 5

Test of the flavor independence of strong interactions ..... K. Abe *et al.* (SLD Collaboration) R2271
Increasing R_b and decreasing R_c with new heavy quarks ..... Ernest Ma R2276
Hyperon production mechanisms and single-spin asymmetry in high energy hadron-hadron collisions ..... C. Boros and Liang Zuo-tang R2279
Naturally light scalars ..... John Terning R2284
Master formula approach to chiral symmetry breaking and $\pi\pi$ scattering ..... Hidenaga Yamagishi and Ismail Zahed R2288
Dicyclic horizontal symmetry and supersymmetric grand unification ..... Paul H. Frampton and Otto C. W. Kong R2293
