# Current Rapid Communications

*Rapid Communications in Physical Review are short reports of important new work which are of sufficient interest to be given priority handling in the publication process. The following papers have been accepted for publication as Rapid Communications and appear as indicated in the designated Physical Review issues.*

**Physical Review A, Vol. 53, May 1996, Issue 5**

Protective measurement of the wave function of a single squeezed harmonic oscillator state ..... Orly Alter and Yoshihisa Yamamoto R2911

Improving energies by using exact electron densities ..... Kieron Burke, John P. Perdew, and Mel Levy R2915

Employing homogeneity properties of density functionals to determine the total electronic energy ..... Robert C. Morrison and Robert G. Parr R2918

Picosecond laser probing of rotational alignment of NO in $CO_2$ ..... Wolfgang Schade, Joachim Walewski, Axel Offt, and Axel Knaack R2921

Interaction of slow $Ar^{(17,18)+}$ ions with $C_{60}$: An insight into ion-surface interactions ..... J.-P. Briand, L. de Billy, J. Jin, H. Khemliche, M. H. Prior, Z. Xie, M. Nectoux, and D. H. Schneider R2925

Ionization of very-high-*n* Rydberg atoms by half-cycle pulses in the short-pulse regime ..... M. T. Frey, F. B. Dunning, C. O. Reinhold, and J. Burgdörfer R2929

Recollisions, bremsstrahlung, and attosecond pulses from intense laser fields ..... M. Protopapas, D. G. Lappas, C. H. Keitel, and P. L. Knight R2933

Spin-orbit coupling in free-space Laguerre-Gaussian light beams ..... L. Allen, V. E. Lembessis, and M. Babiker R2937

Optimal control of piezophotonic and magnetophotonic switching in a dense medium of three-level atoms ..... Ningjun Wang, Herschel Rabitz, Aaron S. Manka, and Charles M. Bowden R2940
