Current Rapid Communications

Rapid Communications in Physical Review are short reports of important new work which are of sufficient interest to be given priority handling in the publication process. The following papers have been accepted for publication as Rapid Communications and appear as indicated in the designated Physical Review issues.

Physical Review B, Vol. 53, 15 May 1996, Issue 20

NMR study of the anomalous metallic state below the CDW transition temperature in $Rb_3Cu_8S_6$: A possibility of self-organized spinless solitons ..... Atsushi Goto, Hiroshi Yasuoka, Masahiko Isobe, Akihiko Hayashi, and Yutaka Ueda R13223

Binding energies of hydrogen to the $Si(111)7 \times 7$ surface studied by statistical scanning tunneling microscopy ..... D. Rogers and T. Tiedje R13227

Kinetics of surfactant-mediated epitaxy of III-V semiconductors ..... N. Grandjean and J. Massies R13231

Equivalence of the transmission-eigenvalue density in supersymmetric and scaling theories of disordered wires without time-reversal symmetry ..... B. Rejaei R13235

Tunneling conductance of Luttinger liquids: Resonances ..... V. Ashvin, G. V. Vijayagovindan, and N. Kumar R13239

Structural and spectroscopic investigations of CdS/HgS/CdS quantum-dot quantum wells ..... A. Mews, A. V. Kadavanich, U. Banin, and A. P. Alivisatos R13242

Magnetic switching and thermal enhancement of quantum transport through nanowires ..... E. N. Bogachek, A. G. Scherbakov, and Uzi Landman R13246

Symmetry breaking of the admittance of a classical two-dimensional electron system in a magnetic field ..... P. K. H. Sommerfeld, R. W. van der Heijden, and F. M. Peeters R13250

Electron confinement in *a*-Si:H and an effective mass theorem for amorphous semiconductors ..... G. J. Morgan and J. Okumu R13254

Scanning-tunneling-microscopy study of InP(001) surfaces prepared by UHV decapping of metal-organic vapor-phase-epitaxy-grown samples ..... N. Esser, U. Resch-Esser, M. Pristovsek, and W. Richter R13257

Magneto-optical evidence of the percolation nature of the metal-insulator transition in the two-dimensional electron system ..... I. V. Kukushkin, Vladimir I. Fal'ko, R. J. Haug, K. v. Klitzing, and K. Eberl R13260

Electronic structure and optical properties of coupled quantum dots .... J. H. Oh, K. J. Chang, G. Ihm, and S. J. Lee R13264

Electron weak localization in disordered films ..... Tan Li and Ping Sheng R13268

Extending the high-frequency limit of a single-electron transistor by on-chip impedance transformation ..... J. Pettersson, P. Wahlgren, P. Delsing, D. B. Haviland, T. Claeson, N. Rorsman, and H. Zirath R13272

Paired states in the even integer quantum Hall effect ..... A. M. Tikofsky and S. A. Kivelson R13275

Low-frequency anomalies and scaling of the dynamic conductivity in the quantum Hall effect ..... B. M. Gammel and W. Brenig R13279

Electron drift reversal caused by remaining holes in semiconductor superlattices due to effective-mass filtering ..... M. Hosoda, K. Tominaga, P. O. Vaccaro, and T. Watanabe R13283

Raman efficiency in a planar microcavity ..... A. Fainstein, B. Jusserand, and V. Thierry-Mieg R13287

Large and irregular shift of photoluminescence excitation spectra observed in photochemically etched porous silicon ..... Hideki Koyama, Noriko Shima, and Nobuyoshi Koshida R13291

Ultrafast photoexcited cyclotron emission: Contributions from real and virtual excitations ..... Daniel Some and Arto V. Nurmikko R13295

Surface energetics and thermal roughening of Ag(115) studied with STM movies ..... M. S. Hoogeman, D. C. Schlösser, J. B. Sanders, L. Kuipers, and J. W. M. Frenken R13299

Prediction of a pure-carbon planar covalent metal ..... Vincent H. Crespi, Lorin X. Benedict, Marvin L. Cohen, and Steven G. Louie R13303

Confinement mechanism for strong temperature dependence of the interlayer exchange coupling in Co/Cu(110) ..... J. d'Albuquerque e Castro, J. Mathon, Murielle Villeret, and A. Umerski R13306

Quantum-well-driven magnetism in thin films ..... S. Mirbt, B. Johansson, and H. L. Skriver R13310

Resonant enhancement of second-harmonic generation of electric quadrupole origin in phthalocyanine films ..... Toshiki Yamada, Hajime Hoshi, Takaaki Manaka, Ken Ishikawa, Hideo Takezoe, and Atsuo Fukuda R13314

Physical Review D, Vol. 53, 1 June 1996, Issue 11

Structure of Pomeron couplings and single-spin asymmetry in diffractive $Q\overline{Q}$ production ..... S. V. Goloskokov R5995
