Current Rapid Communications

Rapid Communications in Physical Review are short reports of important new work which are of sufficient interest to be given priority handling in the publication process. The following papers have been accepted for publication as Rapid Communications and appear as indicated in the designated Physical Review issues.

Physical Review D, Vol. 56, 15 September 1997, Issue 6

Choptuik scaling and the scale invariance of Einstein's equation ..... David Garfinkle R3169
Higher order graviton scattering in M(atrix) theory ..... Katrin Becker, Melanie Becker, Joseph Polchinski, and Arkady Tseytlin R3174

Physical Review E, Vol. 56, September 1997, Issue 3

Exact solution of a two-dimensional random Ising model ..... Maurizio Serva R2339
Analysis of a dissipative model of self-organized criticality with random neighbors ..... Marie-Line Chabanol and Vincent Hakim R2343
Universal macroscopic background formation in surface super-roughening ..... H.-W. Lee and Doochul Kim R2347
Rectification by hopping motion through nonsymmetric potentials with strong bias ..... K. W. Kehr, K. Mussawisade, T. Wichmann, and W. Dieterich R2351
Noise, order, and spatiotemporal intermittency ..... H. L. Yang, Z. Q. Huang, and E. J. Ding R2355
Chaotic nucleation of mestable domains ..... M. Argentina and P. Coullet R2359
Pressure statistics for locally isotropic turbulence ..... Reginald J. Hill and Oluş N. Boratav R2363
Propagation of surface deformation coupled with convection waves under the excitation of a chemical wave train ..... Tatsunari Sakurai, Etsuro Yokoyama, and Hidetoshi Miike R2367
Towards a simple model of compressible Alfvénic turbulence ..... M. V. Medvedev and P. H. Diamond R2371
Weakly nonlinear analysis of the secondary bimodal instability in planar nematic convection ..... Emmanuel Plaut and Roland Ribotta R2375
Self-organized percolation ..... A. M. Alencar, J. S. Andrade, Jr., and L. S. Lucena R2379
Crossover of a block copolymer brush in a polymer melt from a stretched to collapsed conformation ..... Robert Oslanec, Petr Vlcek, William A. Hamilton, and Russell J. Composto R2383
Scale-similar activity in the brain ..... E. Novikov, A. Novikov, D. Shannahoff-Khalsa, B. Schwartz, and J. Wright R2387
Dynamics of a polyampholyte hooked around an obstacle ..... H. Schiessel, I. M. Sokolov, and A. Blumen R2390
Channeling of intense laser beams in underdense plasmas ..... M. D. Feit, J. C. Garrison, and A. M. Rubenchik R2394
