

Current Rapid Communications

Rapid Communications in Physical Review are short reports of important new work which are of sufficient interest to be given priority handling in the publication process. The following papers have been accepted for publication as Rapid Communications and appear as indicated in the designated Physical Review issues.

Physical Review D, Vol. 56, 15 October 1997, Issue 8

CDM models with a smooth component	Michael S. Turner and Martin White	R4439
Exact solutions in two-dimensional string cosmology with back reaction	Sukanta Bose and Sayan Kar	R4444

Physical Review E, Vol. 56, October 1997, Issue 4

Nonuniversality of weak synchronization in chaotic systems	Maria de Sousa Vieira and Allan J. Lichtenberg	R3741
Avalanches and waves in the Abelian sandpile model	Maya Paczuski and Stefan Boettcher	R3745
Real-time experimental control of a system in its chaotic and nonchaotic regimes		
..... David J. Christini, Visarath In, Mark L. Spano, William L. Ditto, and James J. Collins		R3749
Temperature fluctuation properties in sodium convection	S. Cioni, S. Horanyi, L. Krebs, and U. Müller	R3753
Boundary-layer analysis of a spiral wave core: Spiral core radius and conditions for the tip separation from the core boundary	J.M. Starobin, C.F. Starmer, and A.J. Starobin	R3757
Morphology of spinodal decomposition	Klaus R. Mecke and Victor Sofonea	R3761
Worm structure in modified Swift-Hohenberg equation for electroconvection	Yuhai Tu	R3765
Effects of surface topography on formation of defects in SmC* devices explained using an alternative chevron description	P. Watson, P.J. Bos, and J. Pirs	R3769
Dynamics of star polymers: Evidence for a structural glass transition	J. Stellbrink, J. Allgaier, and D. Richter	R3772
Adhesion-induced vesicle propulsion		
..... Isabelle Durand, Petra Jönson, Chaouqi Misbah, Alexandre Valance, and Klaus Kassner		R3776
Comparison of electron bunch asymmetry as measured by energy analysis and coherent transition radiation		
..... Gi. Schneider, M.G. Billing, R. Lai, and A.J. Sievers		R3780
Stability of an optical soliton with Gaussian tails	Sergei K. Turitsyn	R3784
