

Current Rapid Communications

Rapid Communications in Physical Review are short reports of important new work which are of sufficient interest to be given priority handling in the publication process. The following papers have been accepted for publication as Rapid Communications and appear as indicated in the designated Physical Review issues.

Physical Review A, Vol. 57, January 1998, Issue 1

Qubit-qubit interaction in quantum computers	Julio Gea-Banacloche	R1
Orientation dependent dissociative charge transfer	W. Wu, M.H. Prior, and H. Bräuning	R5
Oscillatory alignment phenomena in Rydberg-atom-rare-gas collisions	William A. Isaacs and Michael A. Morrison	R9
Anomalous final-state distributions of electrons captured from directed Rydberg states	D.M. Homan, K.B. MacAdam, and M.J. Cavagnero	R13
Control of photodetachment through a two-color low-frequency field	S. Bivona, R. Burlon, and C. Leone	R16
CO ₂ -laser optical lattice with cold rubidium atoms	S. Friebe, C. D'Andrea, J. Walz, M. Weitz, and T.W. Hänsch	R20
Phase change of a probe due to oscillation of cold atoms in an optical standing wave	M. Kozuma, K. Nakagawa, W. Jhe, and M. Ohtsu	R24
Josephson effect between trapped Bose-Einstein condensates	Ivar Zapata, Fernando Sols, and Anthony J. Leggett	R28
Collective excitations of Bose-Einstein-condensed gases at finite temperatures	R.J. Dodd, Mark Edwards, Charles W. Clark, and K. Burnett	R32
Coherent spectroscopic effects in the propagation of ultrashort pulses through a two-level system	Jinendra K. Ranka, Robert W. Schirmer, and Alexander L. Gaeta	R36

Physical Review D, Vol. 57, 1 January 1998, Issue 1

On the resummed gluon anomalous dimension and structure functions at small x	Johannes Blümlein and Andreas Vogt	R1
Soft modes associated with chiral transition at finite temperature	S. Chiku and T. Hatsuda	R6
Probing the structure of the virtual photon in the deep inelastic Compton process at the DESY HERA collider	Maria Krawczyk and Andrzej Zembrzuski	R10
