Current Rapid Communications

Rapid Communications in Physical Review are short reports of important new work which are of sufficient interest to be given priority handling in the publication process. The following papers have been accepted for publication as Rapid Communications and appear as indicated in the designated Physical Review issues.

Physical Review A, Vol. 59, March 1999, Issue 3

Semiclassical time-dependent propagation in three dimensions for a Coulomb potential ..... Gerd van de Sand and Jan M. Rost R1723

Real-time study of femtosecond harpooning reaction in $Ba\cdots FCH_3$ ..... V. Stert, P. Farmanara, W. Radloff, F. Noack, S. Skowronek, J. Jimenez, and A. González Ureña R1727

Mirroring behavior of partial photodetachment and photoionization cross sections in the neighborhood of a resonance ..... Chien-Nan Liu and Anthony F. Starace R1731

Very high multiplicity distributions of electrons emitted in multicapture collisions between Xe^{25+} and C_{60} ..... Serge Martin, Li Chen, Alain Denis, and Jean Désesquelles R1734

Biaxial spatial orientation of atomic angular momentum ..... Valery Milner and Yehiam Prior R1738

Interplay of electron correlation and intense field dynamics in the double ionization of helium ..... A. Becker and F. H. M. Faisal R1742

Resonance technique to probe ^{129}Xe surface interactions ..... K. L. Sauer, R. J. Fitzgerald, and W. Happer R1746

Long spin relaxation times in a single-beam blue-detuned optical trap .... R. Ozeri, L. Khaykovich, and N. Davidson R1750

Optical control and entanglement of atomic Schrödinger fields ..... M. G. Moore and P. Meystre R1754
