Current Rapid Communications

Rapid Communications in Physical Review are short reports of important new work which are of sufficient interest to be given priority handling in the publication process. The following papers have been accepted for publication as Rapid Communications and appear as indicated in the designated Physical Review issues.

Physical Review A, Vol. 59, June 1999, Issue 6

Role of exchange and kinematic in the generation of low-energy polarized electron pairs ..... M. Streun, G. Baum, W. Blask, and J. Berakdar R4109

Collisions of cold magnesium atoms in a weak laser field ..... Mette Machholm, Paul S. Julienne, and Kalle-Antti Suominen R4113

Complete view of Stark wave-packet evolution ..... M. B. Campbell, T. J. Bensky, and R. R. Jones R4117

Floquet analysis of the dynamical stabilization of the kicked hydrogen atom ..... S. Yoshida, C. O. Reinhold, P. Kristöfel, J. Burgdörfer, S. Watanabe, and F. B. Dunning R4121

Collisional relaxation in a fermionic gas ..... Gabriele Ferrari R4125

Population inversion between atomic inner-shell vacancy states created by electron-impact ionization and Coster-Kronig decay ..... D. Kim, C. Tóth, and C. P. J. Barty R4129
