**Erratum: Frustrated Dipole Order Induces Noncollinear
Proper Ferrielectricity in Two Dimensions
[Phys. Rev. Lett. **123**, 067601 (2019)]**

In our Letter, we studied the noncollinear dipole order in two-dimensional materials MO_2X_2 . There were errors in the *notation* of the space groups, although the space groups themselves are correct. The only problem is regarding the choice of unique axis. In our figures, the out-of-plane direction is the c axis, while some space groups mentioned in our original Letter correspond to the b axis as the out-of-plane direction.

- (i) On page 2 of the main text, the right column, line 9–10: “corresponding to the space groups Cc (No. 9) and $P2_1am$ (No. 26)” should be “corresponding to the space groups Bb (No. 9) and $Pb2_1m$ (No. 26).”
 - (ii) In Fig. 2, the notation “ $P2_1am$ ” should be “ $Pb2_1m$,” “ $Pmma$ ” should be “ $Pbmm$,” and “ $Pmm2$ ” should be “ $Pm2m$.”
 - (iii) The Supplemental Material has also been updated to correct the corresponding issues.
- All results and conclusions in our Letter are unaffected.

We thank Professor A. Sundaesan for pointing out the errors.
