ERRATUM

The result reported for the cross section of the high-mass diffractive state, \( \sigma_{XM} = 43 \pm 10 \) mb, is sensitive to the form factor assumed for deuterium. In the original calculation, we used an oversimplified form factor. If we use the more accurate form factor \( S(t) = 0.34e^{1.5t} + 0.58e^{-3t} + 0.08e^{15t} \) discussed in Ref. 4, we obtain \( \sigma_{XM} = 28 \pm 10 \) mb.

In addition, the following typographical errors should be corrected: The second line of the abstract should read "5 < M_2 < 0.1 \text{ s GeV}^2"; and on page 1432, line 14, "5s < M_2 < 0.1s" should read "5 < M_2 < 0.1 \text{ s GeV}^2."
