
There is a misprint in the sentence immediately preceding relation (2); the correct form is the following: "The $A_{22}$ tensor component can be determined by detection of the $L_I$ photons in the scattering plane ($\phi = 0^\circ$) and perpendicular to the scattering plane ($\phi = 90^\circ$) and use of the relation."

The explanation given in the second column of p. 190 for the $b$ dependence of $A_{22}$ is correct in $LS$ coupling. In $j-j$ coupling, which should be more appropriate for our target atom, $A_{22}$ is the sum of products of $m_f = \frac{1}{2}$ and $\frac{1}{2}$ ionization amplitudes normalized to the ionization probability of the total $L_{II}$ subshell.

Through an error the cross section for the $^{12}$C($^{56}$Fe,$X$)$^{11}$C reaction was omitted. The sentence beginning on line 9 of the left column of p. 899 should read, "Using this form, we estimate total cross sections of 111 ± 20 mb and 136 ± 25 mb for the reactions $^{12}$C(RHI,$X$)$^{11}$C with $^{40}$Ar and $^{56}$Fe, respectively."

The byline address was inappropriately listed, and should appear as follows:

Eva Y. Andrei
Bell Laboratories, Murray Hill, New Jersey 07974

(a)Present address: Service de Physique du Solide, Institut de Recherche Fondamentale, Centre d'Etudes Nucléaires de Saclay, F-91191 Gif-sur-Yvette, France.

In the approximate iterative formula, Eq. (7), for the energies of the quantized Hall states, there is an incorrect index on the argument of the function $u_{pl}$. The correct formula is

$$E(v_{s+1}) = E(v_s) + n_s \epsilon_s + n_s |q_s|^{1/2} u_{pl}(m_s + 1). \quad (7)$$

The curve in Fig. 1 was calculated with use of the correct expression.
