**First-Principles Phonon Calculations for  $\text{La}_2\text{CuO}_4$   
[Phys. Rev. Lett. 62, 831 (1989)]**

R. E. Cohen, W. E. Pickett, and H. Krakauer

The calculated values for the anharmonic frequencies of the O  $E_u$ -symmetry mode in Table I were off by a factor of 2, and should read 77 and 296  $\text{cm}^{-1}$ . The second frequency would likely be unobservable due to interaction with other modes, and thus should be disregarded.

**Sheared Boundary Layers in Turbulent Rayleigh-Bénard Convection  
[Phys. Rev. Lett. 64, 2382 (1990)]**

T. H. Solomon and J. P. Gollub

On p. 2382, in the middle paragraph of the second column, the Prandtl number was misprinted as 25. It should be 5.
