Neutron Diffraction Studies of Flowing and Pinned Magnetic Flux Lattices in 2H-NbSe$_2$
[Phys. Rev. Lett. 73, 2748 (1994)]

The critical current in our experiment was mistakenly typeset as $L_c$ in four places in our manuscript, and the applied transport current was typeset as $L$. As in standard usage, these should read $I_c$ and $I$, respectively. The quantities bear no relation to the longitudinal correlation length denoted as $L_c^p$ elsewhere in the text.
