REVIEWS OF MODERN PHYSICS
Volume 70, Number 2, April 1998

323 Instantons in QCD
T. Schäfer and E. V. Shuryak

427 Classical monopoles: Newton, NUT space, gravomagnetic lensing, and atomic spectra
D. Lynden-Bell and M. Nouri-Zonoz

447 Point scatterers for classical waves
Pedro de Vries, David V. van Coevorden, and Ad Lagendijk

467 Hamiltonian description of the ideal fluid
P. J. Morrison

523 Coherent phonon polaritons as probes of anharmonic phonons in ferroelectrics
H. J. Bakker, S. Hunsche, and H. Kurz

537 Results from deuterium-tritium tokamak confinement experiments
R. J. Hawryluk

589 Moon-Earth-Sun: The oldest three-body problem
Martin C. Gutzwiller

RMP Colloquia:

641 The role of the Josephson-Anderson equation in superfluid helium
Richard E. Packard

653 Renormalization group theory: Its basis and formulation in statistical physics
Michael E. Fisher

683 Forthcoming articles

0034-6861(199804)70:2;1-5
