REVIEWS OF MODERN PHYSICS
Volume 70, Number 4, Parts I and II, October 1998

Part I

1039 Metal-insulator transitions
Masatoshi Imada, Atsushi Fujimori, Yoshinori Tokura

Part II

1265 Solar fusion cross sections
Eric G. Adelberger *et al.*, Institute for Nuclear Theory Workshop on Solar Fusion Reactions

1293 Proton-antiproton annihilation and meson spectroscopy with the Crystal Barrel
Claude Amsler

1341 Precision measurements with high-energy neutrino beams
Janet M. Conrad, Michael H. Shaevitz, Tim Bolton

1393 Astrometry and geodesy with radio interferometry: experiments, models, results
Ojars J. Sovers, John L. Fanselow, Christopher S. Jacobs

1455 Topological analysis of chaotic dynamical systems
Robert Gilmore

RMP Colloquia:

1531 Polymer solutions: A geometric introduction
T. A. Witten

1545 Quasinormal-mode expansion for waves in open systems
E. S. C. Ching, P. T. Leung, A. Maassen van den Brink, W. M. Suen, S. S. Tong, K. Young

1555 Forthcoming articles

1557 Volume table of contents

1561 Summary of the PACS scheme—1998

1563 Subject index to volumes 66–70, 1994–1998

1571 Author index to volumes 66–70, 1994–1998
