Reviews of Modern Physics

Volume 71 Special issue 1999

	FOREWORD	Martin Blume
	PREFACE	Benjamin Bederson
	INTRODUCTION	Hans A. Bethe
	HISTORIC PERSPECTIVES—personal essays on historic developments This section presents articles describing historic developments in a number of major areas of physics, prepared by authors who played important roles in these developments. The section was organized and coordinated with the help of Peter Galison, professor of the History of Science at Harvard University.	
S1	**Quantum theory**	Hans A. Bethe
S6	**Nuclear physics**	Hans A. Bethe
S16	**Theoretical particle physics**	A. Pais
S25	**Elementary particle physics: The origins**	Val L. Fitch
S33	**Astrophysics**	George Field
S41	**A century of relativity**	Irwin I. Shapiro
S54	**From radar to nuclear magnetic resonance**	Robert V. Pound
S59	**An essay on condensed matter physics in the twentieth century**	W. Kohn
S78	**A short history of atomic physics in the twentieth century**	Daniel Kleppner

PARTICLE PHYSICS AND RELATED TOPICS

S85	**Quantum field theory**	Frank Wilczek
S96	**The standard model of particle physics**	Mary K. Gaillard Paul D. Grannis Frank J. Sciulli
S112	**String theory, supersymmetry, unification, and all that**	John H. Schwarz Nathan Seiberg
S121	**Accelerators and detectors**	W. K. H. Panofsky M. Breidenbach
S133	**Anomalous *g* values of the electron and muon**	V. W. Hughes T. Kinoshita
S140	**Neutrino physics**	L. Wolfenstein

ASTROPHYSICS

S145	**Cosmology at the millennium**	Michael S. Turner J. Anthony Tyson
S165	**Cosmic rays: the most energetic particles in the universe**	James W. Cronin
S173	**Cosmic microwave background radiation**	Lyman Page David Wilkinson
S180	**Black holes**	Gary T. Horowitz Saul A. Teukolsky
S187	**Gravitational radiation**	Rainer Weiss
S197	**Deciphering the nature of dark matter**	Bernard Sadoulet

NUCLEAR PHYSICS

S205	**Nuclear physics at the end of the century**	E. M. Henley J. P. Schiffer

S220	**Stellar nucleosynthesis**	Edwin E. Salpeter
	ATOMIC, MOLECULAR, AND OPTICAL PHYSICS	
S223	**Atomic physics**	Sheldon Datz G. W. F. Drake T. F. Gallagher H. Kleinpoppen G. zu Putlitz
S242	**Laser spectroscopy and quantum optics**	T. Hänsch W. Walther
S253	**Atom cooling, trapping, and quantum manipulation**	Carl E. Wieman David E. Pritchard David J. Wineland
S263	**Laser physics: quantum controversy in action**	W. E. Lamb W. P. Schleich M. O. Scully C. H. Townes
S274	**Quantum effects in one- and two-photon interference**	L. Mandel
S283	**From nanosecond to femtosecond science**	N. Bloembergen
S288	**Experiment and foundations of quantum physics**	Anton Zeilinger
	CONDENSED MATTER PHYSICS	
S298	**The fractional quantum Hall effect**	Horst L. Stormer Daniel C. Tsui Arthur C. Gossard
S306	**Conductance viewed as transmission**	Yoseph Imry Rolf Landauer
S313	**Superconductivity**	J. R. Schrieffer M. Tinkham
S318	**Superfluidity**	A. J. Leggett

S324	**In touch with atoms**	G. Binnig H. Rohrer
S331	**Materials physics**	P. Chaudhari M. S. Dresselhaus
S336	**The invention of the transistor**	Michael Riordan Lillian Hoddeson Conyers Herring
	STATISTICAL PHYSICS AND FLUIDS	
S346	**Statistical mechanics: A selective review of two central issues**	Joel L. Lebowitz
S358	**Scaling, universality, and renormalization: Three pillars of modern critical phenomena**	H. Eugene Stanley
S367	**Insights from soft condensed matter**	Thomas A. Witten
S374	**Granular material: a tentative view**	P. G. de Gennes
S383	**Fluid turbulence**	Katepalli R. Sreenivasan
S396	**Pattern formation in nonequilibrium physics**	J. P. Gollub J. S. Langer
	PLASMA PHYSICS	
S404	**The collisionless nature of high-temperature plasmas**	T. M. O'Neil F. V. Coroniti
	CHEMICAL PHYSICS AND BIOLOGICAL PHYSICS	
S411	**Chemical physics: Molecular clouds, clusters, and corrals**	Dudley Herschbach
S419	**Biological physics**	Hans Frauenfelder Peter G. Wolynes Robert H. Austin
S431	**Brain, neural networks, and computation**	J. J. Hopfield

COMPUTATIONAL PHYSICS

S438	**Microscopic simulations in physics**	D. M. Ceperley

APPLICATIONS OF PHYSICS TO OTHER AREAS

S444	**Physics and applications of medical imaging**	William R. Hendee
S451	**Nuclear fission reactors**	Charles E. Till
S456	**Nuclear power—fusion**	T. Kenneth Fowler
S460	**Physics and U.S. national security**	Sidney D. Drell
S471	**Laser technology**	R. E. Slusher
S480	**Physics and the communications industry**	W. F. Brinkman D. V. Lang
