REVIEWS OF MODERN PHYSICS
Volume 72, Number 3, July 2000

621 Theoretical approaches to x-ray absorption fine structure
J. J. Rehr and R. C. Albers

655 Molecular dynamics for fermions
Hans Feldmeier and Jürgen Schnack

689 Observations and implications of the ultrahigh-energy cosmic rays
M. Nagano and A. A. Watson

733 The discovery of the heaviest elements
S. Hofmann and G. Münzenberg

769 μSR studies of the vortex state in type-II superconductors
Jeff E. Sonier, Jess H. Brewer, and Robert F. Kiefl

813 Electrophoresis of DNA and other polyelectrolytes: Physical mechanisms
Jean-Louis Viovy

RMP Colloquium:

873 Universality of ac conduction in disordered solids
Jeppe C. Dyre and Thomas B. Schrøder

893 Forthcoming articles
