REVIEWS OF MODERN PHYSICS
Volume 74, Number 3, July 2002

663 *Colloquium*: The future of double β decay research
Yuri Zdesenko

685 Technical approaches for high-average-power free-electron lasers
George R. Neil and Lia Merminga

703 Charge-transfer dynamics studied using resonant core spectroscopies
P. A. Brühwiler, O. Karis, and N. Mårtensson

741 Superfluid ^{3}**He** Josephson weak links
J. C. Davis and R. E. Packard

775 Origin of galactic and extragalactic magnetic fields
Lawrence M. Widrow

825 The holographic principle
Raphael Bousso

875 Nobel Lecture: Bose-Einstein condensation in a dilute gas, the first 70 years and some recent experiments
E. A. Cornell and C. E. Wieman

895 Theory of ultrafast phenomena in photoexcited semiconductors
Fausto Rossi and Tilmann Kuhn

951 Forthcoming articles

0034-6861(200207)74:3;1-7
