

FORTHCOMING ARTICLES

The following is a list of articles scheduled for forthcoming issues of *Reviews of Modern Physics*

Femtosecond x rays from laser-plasma accelerators

S. Corde
K. Ta Phuoc
G. Lambert
R. Fitour
V. Malka
A. Rousse
A. Beck
E. Lefebvre

Nuclear spin physics in quantum dots: An optical investigation

Bernhard Urbaszek
Xavier Marie
Thierry Amand
Olivier Krebs
Paul Voisin
Patrick Malentinsky
Alexander Högele
Atac Imamoglu

Stochastic models of intracellular transport

Paul C. Bressloff
Jay M. Newby

Quantum fluids of light

Iacopo Carusotto
Cristiano Ciuti

***Colloquium:* Three-body forces: From cold atoms to nuclei**

Hans-Werner Hammer
Andreas Nogga
Achim Schwenk

Neutral pion lifetime measurements and the QCD chiral anomaly

A. M. Bernstein
Barry R. Holstein

***Colloquium:* Spontaneous magnon decays**

M. E. Zhitomirsky
A. L. Chernyshev

Pregalactic metal enrichment: The chemical signatures of the first stars

Torgny Karlsson
Volker Bromm
Joss Bland-Hawthorn

Magnetic cluster excitations

Albert Furrer
Oliver Waldmann

Radiative corrections in precision electroweak physics: A historical perspective

Alberto Sirlin
Andrea Ferroglia
