

## REVIEWS of MODERN PHYSICS

Volume 91, Number 2, April–June 2019

---

- 021001 *Colloquium*: Many-body localization, thermalization, and entanglement  
Dmitry A. Abanin, Ehud Altman, Immanuel Bloch,  
and Maksym Serbyn
- 021002 *Colloquium*: Physical constraints for the evolution of life on exoplanets  
Manasvi Lingam and Abraham Loeb
- 021003 *Colloquium*: Fractional electromagnetism in quantum matter and high-energy physics  
Gabriele La Nave, Kridsanaphong Limtragool,  
and Philip W. Phillips
- 021004 *Colloquium*: Ionic phenomena in nanoscale pores through 2D materials  
Subin Sahu and Michael Zwolak
- 025001 Quantum resource theories  
Eric Chitambar and Gilad Gour
- 025002 Exploring astrophysics-relevant magnetohydrodynamics with pulsed-power  
laboratory facilities  
S. V. Lebedev, A. Frank, and D. D. Ryutov
- 025003 Electronic coarse graining: Predictive atomistic modeling of condensed matter  
F. S. Cipcigan, J. Crain, V. P. Sokhan, and G. J. Martyna
- 025004 Mesoscopic simulations at the physics-chemistry-biology interface  
Massimo Bernaschi, Simone Melchionna, and Sauro Succi
- 025005 Ultrastrong coupling regimes of light-matter interaction  
P. Forn-Díaz, L. Lamata, E. Rico, J. Kono, and E. Solano
- 025006 The modern era of light kaonic atom experiments  
Catalina Curceanu, Carlo Guaraldo, Mihail Iliescu,  
Michael Cargnelli, Ryugo Hayano, Johann Marton,  
Johann Zmeskal, Tomoichi Ishiwatari, Masa Iwasaki,  
Shinji Okada, Diana Laura Sirghi, and Hideyuki Tatsuno

Quantum resource theory allows for studying the processing of some quantum feature, such as entanglement, under certain physical operations. [Eric Chitambar and Gilad Gour, Rev. Mod. Phys. **91**, 025001 (2019)]
