Reviews of Modern Physics
Volume 92, Number 4, October–December 2020

040001 Editorial: Promoting Inclusive and Respectful Communications
Michael Thoennessen

041001 *Colloquium*: Unusual dynamics of convection in the Sun
Jörg Schumacher and Katepalli R. Sreenivasan

041002 *Colloquium*: Statistical mechanics and thermodynamics at strong coupling: Quantum and classical
Peter Talkner and Peter Hänggi

041003 *Colloquium*: Quantum crystallizations of ^{4}He in superfluid far from equilibrium
R. Nomura and Y. Okuda

045001 APS Medal for Exceptional Achievement in Research: Topology and other tools in condensed matter physics
Bertrand I. Halperin

045002 Mechanical behavior of solid helium: Elasticity, plasticity, and defects
John Beamish and Sébastien Balibar

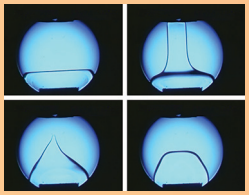

045003 Hadronic structure in high-energy collisions
Karol Kovařík, Pavel M. Nadolsky, and Davison E. Soper

045004 Light rays, singularities, and all that
Edward Witten

045005 Large D limit of Einstein's equations
Roberto Emparan and Christopher P. Herzog

045006 Grand unified neutrino spectrum at Earth: Sources and spectral components
Edoardo Vitagliano, Irene Tamborra, and Georg Raffelt

045007 Neutrinoless double-electron capture
K. Blaum, S. Eliseev, F. A. Danevich, V. I. Tretyak, Sergey Kovalenko, M. I. Krivoruchenko, Yu. N. Novikov, and J. Suhonen

Change of the ^{4}He crystal shape under reduced gravity. [R. Nomura and Y. Okuda., Rev. Mod. Phys. **92**, 041003 (2020)]

0034-6861(202010)92:4*1;1-S
