Reviews of Modern Physics
Volume 97, Number 1, January–March 2025

011001 *Colloquium*: Synthetic quantum matter in nonstandard geometries
Tobias Grass, Dario Bercioux, Utso Bhattacharya, Maciej Lewenstein, Hai Son Nguyen, and Christof Weitenberg

015001 Using gravitational waves to see the first second of the Universe
Rishav Roshan and Graham White

015002 Macroscopic stochastic thermodynamics
Gianmaria Falasco and Massimiliano Esposito

015003 Massive quantum systems as interfaces of quantum mechanics and gravity
Sougato Bose, Ivette Fuentes, Andrew A. Geraci, Saba Mehsar Khan, Sofia Qvarfort, Markus Rademacher, Muddassar Rashid, Marko Toroš, Hendrik Ulbricht, and Clara C. Wanjura

015004 Wrinkles, creases, and cusps in growing soft matter
Martine Ben Amar

015005 The need for optoacoustic microscopy
Ludwig Englert, Dominik Jüstel, and Vasilis Ntziachristos

015006 Quantum-information methods for quantum gravity laboratory-based tests
Chiara Marletto and Vlatko Vedral

015007 Self-aligning polar active matter
Paul Baconnier, Olivier Dauchot, Vincent Démery, Gustavo Düring, Silke Henkes, Cristián Huepe, and Amir Shee

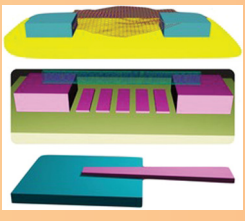

Illustration of state-of-the-art clamped mechanical resonators, including a suspended 2D graphene sheet, a 1D doubly clamped carbon nanotube, and a 1D singly clamped beam. [Sougato Bose *et al.*, Rev. Mod. Phys. **97**, 015003 (2025)]
