Reviews of Modern Physics
Volume 97, Number 4, October–December 2025

041001 *Colloquium*: The cosmic dipole anomaly
Nathan Secrest, Sebastian von Hausegger, Mohamed Rameez, Roya Mohayaee, and Subir Sarkar

041002 *Colloquium*: Gravitational waves from neutrino-driven core collapse supernovae
A. Mezzacappa, and M. Zanolin

045001 Prospects for supersymmetry at High-Luminosity LHC
Howard Baer, Vernon Barger, Jessica Bolich, Juhi Dutta, Dakotah Martinez, Shadman Salam, Dibyashree Sengupta, and Kairui Zhang

045002 Statistical mechanics for networks of real neurons
Leenoy Meshulam, and William Bialek

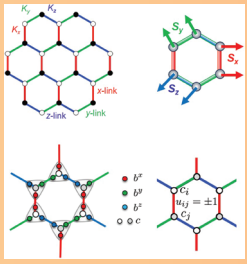

045003 Kitaev quantum spin liquids
Yuji Matsuda, Takasada Shibauchi, and Hae-Young Kee

045004 Astrophysical tests of dark matter self-interactions
Susmita Adhikari, Arka Banerjee, Kimberly K. Boddy, Francis-Yan Cyr-Racine, Harry Desmond, Cora Dvorkin, Bhuvnesh Jain, Felix Kahlhoefer, Manoj Kaplinghat, Anna Nierenberg, Annika H. G. Peter, Andrew Robertson, Jeremy Sakstein, and Jesús Zavala

045005 Spin-glass dynamics: Experiment, theory, and simulation
E. D. Dahlberg, I. González-Adalid Pemartín, E. Marinari, G. Parisi, F. Ricci-Tersenghi, V. Martin-Mayor, J. Moreno-Gordo, R. L. Orbach, I. Paga, J. J. Ruiz-Lorenzo, and D. Yllanes

045006 Quantum cryptography beyond key distribution: Theory and experiment
Mathieu Bozzio, Claude Crépeau, Petros Wallden, and Philip Walther

045007 Neutron stars and the dense matter equation of state
Katerina Chatziioannou, H. Thankful Cromartie, Stefano Gandolfi, Ingo Tews, David Radice, Andrew W. Steiner, and Anna L. Watts

The honeycomb Kitaev model: lattice structure with bond-directional exchange interactions and its exact solution via fractionalization into localized and itinerant Majorana fermions. [Yuji Matsuda, Takasada Shibauchi, and Hae-Young Kee, Rev. Mod. Phys. **97**, 045003 (2025)]
